CHARLES A. GREEN, Founder and President

## Here is the Man You are Dealing With

The above half-tone is from a photograph of the President of the largest Mail Order Nursery Company in the world. Here is a man who is the product of the farm, born and grown to manhood just south of Rochester, N. Y. He early sought for the beauties of rural life, taking great delight in the wild and cultivated fruits of early days. He knew where grew the most productive wild strawberry, raspberry and blackberry, and was never so happy as when visiting them and carrying them home to his mother as trophies of his successful expeditions.

Whenever you see notable achievement you will find a notable man. He is the man behind the gun or the plow.

Charles A. Green is the man behind the gun at the offices of Green's Nursery Co., Rochester, N. Y. He has accomplished notable reforms in the nursery business. After forty years' experience as nurseryman and fruit grower, he has added millions to the wealth of this country through high-grade plants, vines and trees which he has so widely disseminated. Mr. Green started in life as a farmer's boy. Later he was for fifteen years a banker at Rochester, N. Y. He is now a nurseryman, the associate editor of Green's American Fruit Grower, a trustee in a bank having \$13,000,000 in deposits, is director of a state bank, and is the president of a large and prosperous city church.

Mr. Green is the man who has made the greatest success in selling and distributing trees direct to the planter without the expensive method of dealing through nursery agents who travel through the country soliciting orders. Through this direct method of dealing and selling, Mr. Green has saved his patrons hundreds of thousands of dollars.

## OUR EDITORIAL PAGES

By GREEN, THE VETERAN FRUIT GROWER AND NURSERYMAN

### Most Important:

"A field of grain, an orchard, a fountain, and a wood,  
Is all the wealth by early mortals understood."

The poet here intends to say there are few necessities, and that they consist of something to eat, something to drink and the wood to burn and build with.

The above illustration is the poet's thought of ideal planting or the setting out of a tree. Such work is indeed poetic and stimulating to the imagination. He who plants a tree creates something. He is the benefactor of his race not only, but to other races such as birds, squirrels and other wild creatures. What pleasanter pastime for the rigid days of winter than in planning a fruit garden wherein shall blossom and multiply the various hardy fruits of the north? Those who are now making plans for next year's planting may dream of future fruitage and in imagination gather the fruits long before they come into being. These are poetic thoughts though not entirely different from those of the orchardist who sees in the years to come, after the planting, train loads of fruits leaving his railroad station for distant markets.

Last summer it was estimated that over eight thousand (8,000) carloads of peaches were shipped from Rochester district, mostly along the southern shore of Lake Ontario and for many miles inland.

**How to Help Win the War**—We are told by our wise men of national repute that farmers and fruit growers can be as helpful in winning the war as can our soldiers in the trenches at the front. Food products are as serviceable as machine guns or cannons. Canned berries and dried or preserved fruits are welcome to our soldiers and are absolutely necessary. Those who plant berry bushes or fruit trees are furnishing much needed and helpful appetizers, not only at the war front, but in the homes of our people. In order to

help it is not necessary that you plant fruit by the acre, for you can aid greatly by having an ample supply in your fruit garden near your kitchen door. Your reward for this planting will not be alone in patriotism thus displayed, but also in the dollars and cents, for nothing that grows has proved more profitable of late years than garden and orchard fruits. Here is an opportunity for the boys who are too young to go to war to do their bit.

**Testing Our Gifts**—As I look out from my window I see a red squirrel exercising himself vigorously in the branches of an old oak tree. He makes daily visits to this tree simply to exercise his faculties, as there are no nuts upon the tree. I notice that my doves take delight in skirting the city and visiting neighboring towns in rapid flight, often coming back without resting or securing food. They delight in testing their inclinations to fly. Fishes and other creatures delight in testing their faculties for moving about for pleasure or in seeking food. The same inclinations may be seen in man, who takes pleasure in testing his strength or his inclinations. Thus as a boy I took my greatest delight in setting out berry plants and in hunting for wild berries. Here is one reason why the kitchen fruit garden is so great an attraction to the home.

By nature we are all berry pickers, apple, peach and plum pickers. We inherit this from our forefathers, who in remote ages lived almost entirely upon wild fruits. Further than this we are led by nature to do those things that add to our well being and longevity as do the fruits of our gardens and orchards.

**For those Who Want the Best**—C. A. Green is growing plants, vines and trees for those who want the best. He contends that he has the best blocks of apples, peaches, pears, etc., that can be found anywhere in the country. Experienced planters who have seen these big fields of fruit trees

have said that they were the best in the country. Not only are they large, vigorous trees, full of vitality, but they have come from buds or grafts of trees in bearing at Green's Fruit Farm, thus can be relied upon to be absolutely true to name, which is one of the most important things in connection with tree growing. But further than this, C. A. Green's men of long experience have learned how to dig, pack and ship trees so that they will reach destination in the best possible condition.

**He Owns the Fruit Farm Still**—Though I was compelled, owing to the growth of business, to leave the Fruit Farm and Nursery for the city of Rochester, I still own it, and have not thought of selling. We spend many happy weeks on this farm each season and visit it often. My book, "How I Made the Old Farm Pay," gives a full account of the planting of berry fields, vineyards and orchards on an ordinary grain farm, and how I made the old farm pay. Price postpaid, twenty-five cents.

### THE BIRTH OF THE MAIL ORDER NURSERY

Nearly 40 years ago C. A. Green established the first large nursery mail order business. This new idea occurred to me through learning the excessive cost of selling trees through nursery agents. The method of selling trees by catalog, through orders sent by mail, has saved the country millions of dollars, and has enabled many people to buy plants, vines and trees, who otherwise would not have been able to do so. By our method, we employ no traveling agents, we simply send out our catalog soliciting your patronage, thus offering prices as low as they can be made with safety.

This direct method of dealing demands confidence, since payment is made at the time of ordering. Nearly forty years of service has increased this confidence, as has the fact that we have possession of many farms and a capital of over \$100,000. That we have the confidence of the people is indicated by the constant increase in our business through a long period of honest effort to serve our patrons in the best manner possible.

For index of this catalog, see the last pages of catalog.

**OUR IMPLEMENT DEPARTMENT**—Notice that Green's Nursery Company, Rochester, N. Y., have an implement department wherein we offer spray pumps and spray mixtures, essentials for making sprays and insecticides. Our spraying devices are of various sizes and forms to meet the wants of large and small fruit growers. We sell quart berry boxes, also hand and horse cultivators, pruning saws and pruning shears of various styles, also grafting wax and tools. For particulars see latter pages of this catalog.

I advise that you do not plant too large evergreen trees and nut trees, for the reason that smaller evergreen trees and smaller nut trees are far more successful when transplanted than larger trees. I assure you that you gain nothing by planting large evergreen and nut trees, since smaller trees of these two classes will outstrip the larger trees in growth, and you can be more sure of successful transplanting. This rule does not apply to other fruit trees, except that we do not advise planting overgrown trees of any kind.

There were more gardens planted in the course of the past season than ever before in the Nation's history. There will be a still larger number planted next season, as our work in the great war becomes more intensive, says the Housewife Magazine. This illustrates the high esteem in which fruits and flowers are held.

Dwarf pear trees come into bearing very soon after planting and continue for many years. When I moved onto the farm now known as Green's Fruit Farm, there was standing near the house a dwarf Bartlett pear tree about twenty years old. This tree had been neglected. I was surprised to find this tree heavily loaded with beautiful pears the first year we moved on the farm.

### BEAUTIFYING HOME SURROUNDINGS

The home grounds can be beautified without much expense or labor. Some skill is demanded in knowing where to plant shrubs and trees, where to have an open expanse of lawn, which is desirable and necessary, and where the driveway and walks can be best introduced.

In a new country such as this, it cannot be expected that every man who owns a farm has had time or is able to give much attention to the lot or space around his dwelling. I notice, however, that greater attention is being given each year to this important subject.

**A Bushel from a Vine**—"How much fruit will a grape-vine produce?" I am asked. This depends largely upon the variety, how it is trained and pruned, and upon the soil on which it grows; but I assure you there is no difficulty in securing one or two bushels of grapes from a vine so prolific as the Concord, Worden, Niagara and many others, particularly if the vine is growing near the walls of the house with plenty of opportunity to climb around the buildings and over the porch. The average vine as grown in the vineyard will not have such an opportunity for a large yield, but even in the vineyard the vines should yield a bushel of grapes each. In order to indicate there is scarcely a limit to the productiveness of the grapevine, I will say that there are well authenticated instances where a single grapevine has grown a ton of grapes, but this has been secured only after many years of fruiting when the vine had been able to cover a large space, the roots finding nourishment in remarkably fertile soil and under the most favorable conditions.

While the grapevine responds to high culture, it will bear fruit abundantly without any cultivation, which cannot be said of most fruits. The vine growing over my dwelling does not receive any cultivation and yet it spreads over a surface of 50 ft. in length and about 12 ft. in height. I have seen grapes growing in a neglected vineyard which had received no cultivation, but which produce abundantly.

**Dwarf Pear Hedge Plan**—I shall never get tired of telling of my experience in planting dwarf pear trees three feet apart in a row across my garden. Dwarf pears are ordinarily planted from eight to twelve feet apart both ways, but these trees planted three feet apart in my garden gave me splendid crops of fruit and began to bear very soon after planting. Three of these trees are Seckel pears, which are usually small but of delicious quality, being the sweetest pear known. As an experiment I drew a one-horse load of stable manure and spread it over the ground under these dwarf Seckel pear trees. The next year the size of these pears was increased nearly half, the trees were heavily laden, and no thinning of the fruit was done, as it should have been, were the pears grown for market.

I know of no more attractive fruit trees in the home garden or in the corner of the lawn than a group or row of dwarf pear trees, embracing the different varieties such as Bartlett, Clapp's Favorite, Anjou, Seckel and Duches. For market purposes the Duches has been considered the most profitable of all dwarf pears. It is much larger than the Bartlett.

### GREEN'S SPECIAL DWARF PEAR OFFER

I am so anxious that our patrons shall plant a row or two of dwarf pear trees across their garden, the trees to be set three feet apart in the row, I will make a special low priced offer to any person who may write me stating that he is intending to plant a dwarf pear hedge and desires a special low price for 50 or 100 smallish but superior dwarf pear trees with extraordinarily good roots.

I have found that it is not necessary that dwarf pear trees for these garden rows or dwarf pear hedges shall be large size trees, hence this proposition.

C. A. GREEN, Rochester, N. Y.

## THIS CATALOG IS OUR ONLY SALESMAN

In presenting this 40th edition of our catalog we extend thanks for your past patronage and assure you and all customers prompt and careful attention to all inquiries and orders they may favor us with.

**HOW TO ORDER**—Please make out your order on detachable order sheet in back of catalog. **Send Payment with order.** Procure a Money Order at your post-office or express office, or a draft at the nearest bank, or send cash in a registered letter. **Mail all to us in the enclosed self addressed envelope.** Follow directions "HOW TO ORDER" on order sheet as closely as possible and make directions very plain as this will prevent any mistakes occurring. If directions are omitted we will forward according to our own judgment. Small orders will go cheaper by express, large orders by freight. **Always state sizes of trees desired.**

**ORDER EARLY**, as our orders are shipped in the rotation they are received—**First come, first served.** We cannot delay orders received first for orders coming later requiring immediate attention. If it is necessary that an order be shipped on a specified date, make a note on the order and we will comply with the request if possible. Our regular shipping season opens in the Spring about March 15th and in the Fall about October 15th.

**PACKING**—We do not charge for packing, boxing or delivering to freight, or express companies at Rochester. We do not prepay any charges, unless goods are to be delivered to a prepaid station, as all our prices and quotations are **Free On Board cars at our nurseries.** If you have no agent at your station and shipment **has to be prepaid**, notify us and we will prepay and bill charges to you after shipment.

**OUR TREES are Clean, Healthy, Hardy and Thrifty.** Finest grown. It is an established fact that in no other part of the country do fruit trees attain the perfection of those grown in Rochester and vicinity. Not one Nurseryman in a thousand buds or grafts his own trees as we do. Our trees are grown and cared for by men who have had years of training and experience. They know how and do turn out the finest fruit trees possible. Our stock is all first class of the different sizes as specified. We do not handle any second

class trees. **All poor trees or culls go into the brush heap.** Our trees are inspected by state authorities every year, and an official certificate of their freedom from disease accompanies each shipment.

**OUR GUARANTEE**—We exercise care to have our stock genuine and reliable and hereby guarantee it to be in good condition when shipped. Our agreement with every purchaser is as follows: if any stock purchased proves untrue to name or label, we will replace the same or refund the purchase price upon due proof of the error and in ease of error on our part, the purchase price shall be the measure of damages and all stock is purchased and sold upon that understanding.

**OUR RESPONSIBILITY**—See any commercial agency, banker or postmaster at Rochester. Our trees are sold by pleased customers recommending us to their friends. We cannot afford to give unsatisfactory service to our patrons. **IF WE PLEASE YOU, TELL YOUR FRIENDS. IF NOT, TELL US.**

**A GOOD REPUTATION.** This is what Chas. A. Green has been working for the past thirty years. When he started this business he found difficulty in selling his trees, but as soon as people found that his trees were **TRUE TO NAME** he could hardly grow enough to supply the demand. "We have heard from our friends that you are fair and reliable and we want your trees because they prove **TRUE TO NAME.**"

**PARCEL POST STOCK** is our smallest size, but good thrifty stock. Express and freight are our best or larger grades.

**CLAIMS** must be made without delay when the goods are received. There are contingencies in tree planting as in everything else, which make it impossible for us to guarantee that every plant or tree will grow. The planter must take some risk. We do not allow claims for delay or loss during

shipment. Transportation companies alone must be held responsible if they are delayed. We will send you good, live, vigorous and healthy trees and plants, fully up to grades and sizes specified in our catalog, and will pack very carefully to insure safe delivery, so that everything you order will be in absolutely A No. 1 condition when you receive it. If it were possible for us to do all the planting, pruning, selecting of soil, and the giving of after care and attention, and had we also control over climatic conditions, we would gladly replace everything that did not live, but not having control over these things, we feel that our responsibility ought to cease when we make delivery to our customers in first-class condition. We will do our part, and then if you give them ordinary care and attention they will live and be a source of pleasure and profit

A block of superior 2-year-old apple trees as grown on the fertile soil of Green's Nursery Company, Rochester, N. Y.

**ABOUT SUBSTITUTION**—We do not substitute in orders for orchard planting. In filling orders from this catalog for garden planting, when the omission of a tree or plant would be a disappointment, we reserve the right, in case we are out of a variety, to substitute another of equal or greater merit (labeling with correct name). All heavy trees in large amounts should be sent by freight, as charges are so much less, and our perfect packing admits a long journey without injury to the trees. Always give full and explicit shipping directions, as our responsibility ends on delivery of trees in good condition to the freight or express office.

**CLUB ORDERS**—Get your neighbors or friends to join you in sending us a club order. We will tie each individual order up separately, carefully labeling it with a tag giving the name of the person to whom it belongs, and pack all the orders together in one box or bale. This will save you quite a little on transportation charges, as large shipments travel at a lower rate than small ones, and if you will plainly specify who is sending the order in, so that there is no misunderstanding, we will be glad to include some extras, of our own selection, as a gift.

#### TEN RATES AND 100 RATES

**TREES**—Less than ten of any variety always at each rate.

10 (or more) of a variety at 10 rates.  
50 (or more) of a kind (as 50 apples, 50 plums), if not composed of less than 10 of any one variety, at 100 rates. Example: 50 Baldwin—or 10 Baldwin, 10 R. I. Greening, 10 McIntosh, 10 King and 10 Wealthy—all apples, and not less than 10 of any one variety) at 100 rates.

**PLANTS**—10 plants at 10 rate if the 10 are all of one variety.

We sell 50 (all of one variety) at half the 100 price, and 500 (all of one variety) at half the 1000 price.

**SPECIAL PRICES ON LARGE ORDERS**—Special quotations on large orders will be given on application. When writing tell us what varieties are wanted, the number of trees of each variety and the size.

**NO ORDERS FOR LESS THAN \$1.00 ACCEPTED**—Inasmuch as it costs us just as much to pack and prepare small orders as it does large ones, and inasmuch as the prices we ask are so close to the actual cost of production, we cannot afford to fill orders amounting to less than \$1.00.

#### FREIGHT AND EXPRESS RATES

—Freight and express rates on trees, plants, vines, etc., have been so reduced that they are now a minor consideration in the purchase of trees. The argument very often used by tree agents in trying to persuade planters to pay their exorbitant prices is that they pay transportation charges, and as a rule catalog or direct dealing nurserymen do not, and as most people do not realize how small freight and express charges usually are, they often gain customers by their absurd arguments. Nursery stock travels at second class rates, and after averaging up the year's business, one of the leading catalog nurserymen found that the average transportation charges amounted to 5 cents for every dollar's worth of nursery stock purchased. This is the average taken from orders received from every state in the Union. If you live at a great distance it would cost you more, but if you live close by it would cost you less, so do not let transportation charges be a bugaboo and keep

you from buying trees direct of the grower at slightly above cost prices.

**TREES AND PLANTS BY PARCEL POST**—To those who live a great distance from our nurseries, along the Pacific coast and in the far southern states we recommend our special grade of trees which we send by mail. Owing to the postoffice regulation limiting the size of package that can be sent by mail we cannot send by mail, trees or shrubs over three feet in height. We guarantee safe arrival of all orders sent by parcel post.

**POSTAGE FOR PARCEL POST**—The additional charge made for sending items by parcel post covers not only the postage, but the additional care in packing and the very high grade of expensive moss necessary to use in parcel post shipments, so if the actual postage on your package when you receive it is less than the amount you have paid, please bear in mind that part of this charge was made for packing and packing material. Do not ask us to refund unused postage. We cannot tell just what the postage and extra packing will amount to. Sometimes it is more than is allowed, sometimes a little less.

**TO OUR CANADIAN CUSTOMERS**—Nursery stock is not admitted from the United States into Canada at all seasons. It is admitted in the spring, commencing March 15th and continuing till May 15th, and in the fall, commencing September 26th and continuing until December 1st. Nursery stock is not admitted through the mails into Canada at any season of the year, so kindly order shipments made by freight or express. We cannot send by parcel post into Canada.

**DUTY ON TREES INTO CANADA**—The duty on trees into Canada is 3 cents per tree, and on bush fruits, such as currants, gooseberries, etc., and ornamental shrubs, 20 per cent. of their value. We accompany all shipments with an invoice, and our Canadian customers will be notified by their customs officers on arrival of shipment the necessary duty to pay, which should be paid direct to the customs office.

**COLLECTIONS**—We cannot make any change in our collections, for they are selected and bundled before our busy shipping season, and the valuable time saved by doing this makes it possible for us to offer these collections at such a reduced price.

A row of apple trees in our experimental orchard from which our buds and scions are taken for budding and grafting. As these are bearing trees, there can be no uncertainty of our trees being true to name. Although these trees are twenty or more years old, they are dwarfed in appearance. This is due to the severe annual pruning to which they are subjected in taking off buds and scions for the propagation of new trees.

**THE BEST VARIETIES TO PLANT.**—We have a large experimental or test orchard and farm, where these numerous varieties are tried out and tested. The varieties that are offered in this catalog are the ones that we have found to be the best. They are the cream of nearly fifty years of careful selection. Confine your selection to this catalog and you will be getting only the choice varieties.

**TREES BUDDED FROM BEARING ORCHARDS.**—It has been our aim to have our trees budded from bearing trees in our own orchards. This not only assures you of trees being true to name, but inasmuch as the buds are always selected from the best, thriftiest and most productive trees only, it gives you the benefit of the superior qualities of the parent tree.

**NO ORDER IS TOO SMALL FOR OUR ATTENTION.** We are just as anxious to serve the patron who orders \$5 or \$10 worth of trees as we are the large fruit grower who orders a thousand dollars' worth, but no orders under \$1 will be accepted.

### READY MONEY IS WHAT MOST PEOPLE ARE LOOKING FOR

How can the girl, the boy, the wife, or the head of the family get ready money? I answered this question when I left Rochester a poor man nearly forty years ago. I set out plants, vines and trees. My strawberries were the first thing to bring me ready money. Soon after followed the raspberries, black berries, grapes, peaches, pears, plums and apples. There is nothing that brings ready money more successfully than fruit growing. There can be no doubt about the product of a Company which has in thirty years built up the largest business of its kind in the world.

## ELEVEN REASONS Why You Should Buy Green's Trees

- Green's Trees are hardy, north-grown and full of life.
- Green's Trees are Quality Trees, straight, smooth, well-formed and true to name.
- Green's Trees will thrive and produce fine fruit in every section of the United States.
- Green's Trees are triple inspected—only the good trees go to you—read our guarantee.
- Green's Trees are well packed in paper lined boxes, which must be used to keep roots from drying in warm weather and from freezing in cold weather.
- Green's Trees have perfect root systems due to whole root grafting and budding, much cultivating and proper digging.
- Green's Trees are only of the Standard Varieties for home use and orchard planting.
- Green's Trees are grown on the land best suited to their needs. For this reason we have three nurseries, each having different kinds of soil.
- Green was the first nurseryman to sell quality trees by catalog only (no tree agents or canvassers). He knows how to grow and sell you quality trees and save you money.
- Green saves you agents' profits and expenses.
- Green has a national reputation for fair dealing.

**HOW TREES ARE GRADED.**—All varieties do not grow to the same height. For instance, the XXX trees of Bismarck and Shiawasse Beauty, which are slower growing varieties, will average about 5½ ft., while the same grade of Wagener and Winter Banana, which are faster growing varieties, will average 6½ to 7 ft. Our small fruits such as grapes, currants, etc., are graded according to age and size, the usual grade we offer being strong two year bushes. Our ornamentals vary in age, depending upon the rapidity of growth, and are graded according to height only.

Orchard of A. W. Wertz, Michigan. These apple trees came from Green's Nursery Co., Rochester, N. Y. Green has supplied thousands of such orchardists all over this vast country. They are monuments to Green's efficiency. Notice beauty of the elm at right.

# HOW TO PLANT AND CARE FOR TREES

**Packing a box of trees for freight shipment. Boxes are lined with heavy paper to keep the frost out and the moisture in**

**WHEN TO PLANT.**—Planting can be done any time the trees are dormant and the ground not frozen. Our trees become dormant about November first and remain so until about June first. We pack our trees in paper-lined boxes to keep the frost out and the moisture in, and are in a position to make shipments all winter long, from November first until June first. In most states however, the planting season extends in the fall, from November first until December fifteenth; in the spring from March first until June first.

**WHAT TO DO WITH THE TREES WHEN THEY ARRIVE.**—If possible remove the trees from the box or bale at once on arrival, and heel them in the ground as quickly as possible without any more exposure of roots to the air than absolutely necessary. A cool cellar or stable is a good place to keep the box of trees while waiting for the day of planting.

**PLANTING.**—The earth, to fill in and about the roots, should be surface soil and well pulverized. Fill the hole with the loose earth so as to bring the tree about one inch lower than it stood in the nursery; place the tree in position, fill in with fine mellow earth between and around the roots with the hand, arranging all the roots in their natural position and pack the soil firmly around them. Fill the hole with earth to the top, pack down with a small maul or your foot. Do not be afraid to pack the earth down firmly. If you pack the earth with your foot do not be afraid to put your weight into it. The trees should be set so that they are just as firm as posts. Throw a bucket of water around each tree to settle the ground, and after the water is soaked in scatter a little loose soil on top to prevent baking. Dwarf trees should be planted deeper than standard trees. These should be planted so that the buds on the juncture of the roots and trunk are two or three inches below the surface of the soil. No staking will be necessary except with very tall trees or those much exposed to the wind. If you use manure as a fertilizer, never let it come in direct contact with the roots, but thoroughly mix it up with the soil, or better yet, put it around on top of the soil after the trees are planted.

**SPECIAL INSTRUCTIONS.**—Grape vines should be planted so that the first bud next to the stem will come on a level with the surface of the ground. Grape vines have two layers of roots, from 6 to 8 inches apart, and in planting spread the lower layer of roots in their natural position; fill in the earth and press down in the soil firmly, then spread the second layer of roots and fill in the balance of the hole. After planting, trim the vines back to two buds. A strong stick four feet long should be driven in at each vine to support the canes the first two years. Strawberries should be

planted so as to leave the crown even with the surface. Too deep planting will smother the plant. All other small or bush fruits, such as raspberries, currants, gooseberries, etc., should be planted about one inch deeper than they stood in the nursery, and, after planting, the tops should be cut back to four or five inches of the ground. In pruning ornamental trees two-thirds of the top should be cut off on all ornamental trees except cut-leaved birch and horse chestnut, which should not be pruned at all. Evergreens should be shaded with a cloth, burlap or paper, to prevent the hot sun from striking the tree for the first two or three weeks, or until the trees start to grow. The ground around newly planted evergreens should be thoroughly soaked after planting. Ornamental shrubs should be planted two inches deeper than they were in the nursery, and the tops cut back one-half. Roses are planted three inches deeper and the tops cut back to within three or four inches above the ground.

**MULCHING.**—This is properly done by placing a layer of coarse manure, straw, marsh hay, leaves or loose chip dirt, from three to six inches deep on the surface about the tree, extending one or two feet further, in each direction, than the roots. This keeps the ground moist, of even temperature, and renders watering unnecessary. When planting upon the lawn or grass plots, if none of these things are obtainable, the sod which was removed in digging the hole can be used. The sod should be inverted and should be moved occasionally through the summer to prevent it from beginning to grow again. Trees properly mulched are more certain to live and also make better growth than those not so treated.

**PRUNING.**—Pruning should be done either immediately before or after planting. This is the most essential work next to planting, and the lack of severe pruning is why many do not succeed. Do not be afraid that you are going to prune your trees too severe. These directions on pruning should be followed out absolutely to the letter. Peach trees require

more severe pruning than anything else. Cut off all the branches close to the body of the tree, and cut back the main stem or leader to within two or three feet of the roots, leaving simply a stubby trunk two or three feet high with every branch removed. With all other fruit trees, such as apples, plums, pears, etc., remove all except three or four sturdy branches, endeavoring to have these branches come on four different sides of the tree to form a well shaped head. Then cut these branches back to within five or six inches of the trunk, and cut the main stem or leader back so that it is just a little bit higher than the ends of the highest branch. Cut off broken or bruised roots.

**At the left an apple tree properly pruned for planting. Leave three or four short stubs of branches to form a head. At the right a peach tree properly pruned, all the branches removed and the trunk cut back to within two or three feet of the roots.**

Hedge Row of Apple Trees

*"He who plants a tree plants hope."*

*"He who plants an orchard plants a home."*

Hilly or rocky fields may often be profitably occupied by apple orchards, if the soil is fertile. Even if the soil cannot be plowed a profitable apple orchard may be established by mulching the soil about each tree or stirring it with the spade or pick until the trees become firmly established. Apple trees require fertile soil, such as is demanded for corn or wheat. Select an elevated site for any kind of orchard in preference to low ground, unless the low ground is located near a large body of water, which protects it from frost. I know of many orchards in western New York embracing only an acre that have yielded the largest portion of the profits of the entire farm; these acre orchards would often yield two hundred barrels of apples, sometimes four hundred barrels. I have known these apples to net two dollars per barrel; thus in favored seasons this orchard would bring in more money than all the other crops united, on a one hundred acre farm. He who would make his farm attractive to family or home, be it in city or country, must surround it with different kinds of fruits. Among these the apple is king. No fruit can be put to so many uses as the apple; it is in season almost the year 'round; the earliest coming at harvest, the latest keeping until harvest time. No fruit is more wholesome, no tree is more beautiful in blossom. An apple tree which may be purchased for thirty cents, you would not have taken out of your garden for fifteen dollars, after it had begun to bear its luscious and beautiful crops. The beautiful red apple, the sprightly yellow apple, the cunning striped apple, the delicious tart apple, and the rich sweet apple—all give you life and health. Apple trees should be planted 30 to 40 feet apart each way.

**HOW TO LAY OUT AN APPLE ORCHARD.**—The larger trees represented in the above cut are those for a permanent orchard. The smaller represent either plum or peach trees used as fillers.

IF APPLE TREES are planted thirty feet or more apart each way, rows of plum trees can be planted between the apples, which grow more rapidly and so protect them from the winds and thus prove a great benefit to the apple trees. After eight or ten years of productiveness, as the space is needed for the apples, the plum trees may be removed, and at the same time have yielded the planter a large return for his outlay and labor.

NO FARM CROP, on the average, will produce one-fourth as much income per acre as will a good orchard. The average price paid for the fruit is steadily on the increase, and the enormous demand for home consumption, foreign shipping, canning and evaporating, assures you that it will continue to increase. We especially recommend planting long keeping winter varieties such as Baldwin, Northern Spy, Wagener, Wismer's Dessert, Shiwassée Beauty and Blenheim Orange.

NUMBER OF TREES to an acre if planted 30 feet apart, 50 trees; 35 feet apart, 35 trees; 40 feet apart, 27 trees.

**FOR THOSE WHO WANT THE BEST.**—C. A. Green is growing plants, vines and trees for those who want the best. He contends that he has the best blocks of apples, peaches, pears, etc., that can be found anywhere in this country. Experienced planters who have seen these big fields of fruit trees have said that they were the best in the country. Not only are they very large, vigorous trees, full of vitality, but they have come from buds or grafts of trees in bearing at Green's Fruit Farm, thus can be relied upon to be absolutely true to name, which is one of the most important things in connection with tree growing. But further than this, C. A. Green's men of long experience have learned how to dig, pack and ship trees so that they will reach destination in the best possible condition.

**A CLUB ORDER.**—Help us, help yourself, and help your neighbors by asking them to join you in sending us a club order, which means two or more orders in one shipment. Your neighbors may never have heard of Green's Nursery Company or its methods of doing business, or they may not have the ability to make out an order. Will you kindly approach them, asking them to join you in an order to come in one package, or, if you prefer, to come in separate packages?

C. A. Green likes to hoe in his garden. For many years he has been taking particular care of a few per cent.

Our artist represents in the cut our C. A. Green doing these favorite trees.

Fruit trees planted along the roadside. This makes a very profitable way to utilize this land. It combines shade, beauty and profit

## WHAT A BANKER SAYS ABOUT US

### The Traders National Bank Rochester, N. Y.

To whom it may concern:

I take great pleasure in saying that I consider Green's Nursery Company entirely reliable, a house of many years' standing, and with undoubted business integrity and honesty.

I believe any merchandise purchased from them will be found strictly according to contract, and true to name.

We have known the officers for many years past, and our business relations have been entirely satisfactory. The company has ample capital for the business done, and we take pleasure in most heartily recommending them to anyone desiring to purchase trees, shrubbery or other nursery stock.

Very truly yours,

HENRY C. BRUWSTER, President.

**WHY TREES DIE.**—The majority of trees that fail to live, die from careless or improper planting. We feel confident that if you will follow carefully the instructions given on these pages, your trees will grow and prove a source of pleasure and profit. Nothing flourishes with neglect. This is true with trees as well as everything else. Handle your trees carefully, plant them correctly and give them a little attention after planting and you will be surprised with the ease with which very favorable results can be obtained.

## WE GROW OUR OWN TREES ON OUR OWN FARMS

We have three farms southwest of this city. The first one contains 134 acres. The next, contains 70 acres, and the third, contains 100 acres. A short distance west of Rochester, we have four separate small farms totaling in all 50 acres.

We do not grow everything on one farm, because different kinds of trees require different soil. For instance, a peach tree grows best on a light soil and a pear tree on a heavy soil, and we grow only that class of tree on each soil that is best adapted to that particular soil.

On these farms we have houses for 20 families, and the nearest village to one of our farms is made up almost entirely of our employees. We have extensive buildings for storage and other purposes, which we are constantly enlarging to meet our requirements.

STATE OF NEW YORK

DEPARTMENT OF FARMS AND MARKETS

DIVISION OF AGRICULTURE

### Certificate of Inspection of Nursery Stock

**This is to Certify** That the nursery stock of **Green's Nursery Company** of Rochester, County of Monroe, State of New York, was duly examined in compliance with the provisions of Section 305 of the Agricultural Law, and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose scale or other dangerously injurious insect pest or pests. This certificate expires September 1, 1918.

CHARLES S. WILSON,

Commissioner of Agriculture.

Dated, Albany, N. Y., September 1, 1917.

### NO DISEASED TREES

Our nurseries are inspected annually by the State Entomologist. A certificate of said inspector is attached to every package that leaves our establishment.

# Green's Special Collections for Spring, 1918

## Green's Apple Collection No. 1

10 Splendid  $4\frac{1}{2}$  to 6 ft. Apple Trees for \$3.00

| 1 Regal—Red     | 2 Niagara—White         |
| 3 Worden—Purple |                         |

Special Price \$1.25 (Sold elsewhere \$2.00)

This Grape Collection can be sent by parcel post if 15 cents is added to the price.

**IMPORTANT**—The trees, bushes, vines, etc., used in these collections are the very best of the grade specified. Do not confuse them with the cheap trash grown and offered by unscrupulous men. We are not bragging. We have been growing trees for nearly half a century and ought to know by this time how to produce the best.

THE ONLY COLLECTION ON THIS PAGE THAT CAN BE SENT BY MAIL IS  
THE GRAPE COLLECTION. SEE SPRAY INSTRUCTIONS PAGE 59.

## Chas. A. Green's List of Select Varieties

**Winter Banana.** (Winter.) A magnificent dessert apple, which on account of its attractive appearance and fine quality commands a readier sale and higher prices than most apples. Packed in boxes for the fancy trade it is in ready demand. The fruit is large and keeps all winter. Flesh whitish, tinged with pale yellow, firm, crisp, tender, subacid. Skin clear pale yellow with beautiful pinkish red blush. Tree vigorous and hardy. Ripens in December, lasts until April.

We have been growing Banana apple at Green's Fruit Farm for many years. The tree is a good grower. No orchardist should feel satisfied without having the Banana apple in his orchard. Price: Large 35 cents, medium 30 cents, small 25 cents each.

**Ben Davis.** (Winter.) The most popular apple grown south of the Baldwin region. Fruit above medium to large. Flesh whitish, firm, juicy, good. Skin yellow, striped, splashed with bright red carmine. Tree medium size. Ripens in January. Price: Large 35 cents, medium 30 cents, small 25 cents each.

**Rome Beauty.** (Winter.) A very fine market variety for the northern and western states. Fruit very large, skin yellow, mottled with bright red; in highly colored specimens almost solid red on exposed cheek, striped with bright carmine. Flesh crisp, juicy, agreeable, mild, subacid. Ripens in November, lasts to April or May. Price: Large 35 cents, medium 30 cents, small 25 cents each.

**Wagener.** (Winter.) Its dwarfish habit and early bearing qualities recommend it as a filler. Fruit large, firm, crisp, tender, very juicy, subacid. Skin bright pinkish red, striped with carmine. Tree large, vigorous and hardy. No orchardist's list of varieties can be complete without this beautiful and superior flavored apple. Ripens in October or November, lasts to February or later. Price: Large 35 cents, medium 30 cents, small 25 cents each.

**American Blush.** (Winter.) An excellent variety for commercial planting. Fruit large, firm, fine grained, tender, crisp, juicy, aromatic. Skin yellow blushed, mottled with red. Ripens in November, keeps until March. Price: Large 35 cents, medium 30 cents, small 25 cents each.

**Hubbardston Nonesuch.** (Winter.) Large, striped yellow and red; flesh yellow, juicy and tender, with an agreeable flavor of acidity and sweetness; of the finest quality and very valuable; bears regularly. Ripens in November, keeps until January. Price: Large 35 cents, medium 30 cents, small 25 cents each.

**Stayman's Winesap.** (Winter.) (Originated from a seed of the Winesap.) Medium to large; yellow covered with red, fine grained, tender, juicy, subacid. Ripens in December, lasts to May. Price: Large 35 cents, medium 30 cents, small 25 cents each.

**Baldwin Apples—the Old Reliable**

**Baldwin.** (Winter.) Without question, the leading commercial variety in New England, New York, Ontario, Ohio, Michigan and in many sections from Colorado to Washington. You are taking absolutely no chances when investing your money in this variety. Absolutely dependable. Fruit large, firm, moderately coarse, yellow or greenish, blushed, mottled and striped with bright red and deep carmine. Prevailing effect is bright red. Tree large, very vigorous, strong and hardy. Ripens in November, lasts until May. Price: Large 35 cents, medium 30 cents, small 25 cents each.

**King (Tompkins King).** (Winter.) Its size and beautiful red color make it well adapted for marketing in fancy packages, and it usually sells at an advance over general varieties. Fruit very large, rather coarse, crisp, tender, juicy, subacid. Skin fine yellow, mottled and washed with orange red and lively bright red, striped and splashed with bright carmine. Tree vigorous and hardy. Ripens in October, lasts to January or later. Price: Large 35 cents, medium 30 cents, small 25 cents each.

**Good Old Rhode Island Greening Apples**

### Green's Apple Collection No. 1

**10 Splendid 4½ to 6 ft. Apple Trees for \$3.00**

4 Green's Baldwin	1 Northern Spy
2 McIntosh	2 R. I. Greening
1 C. A. Green's Selection	

**Special Price \$3.00**

**Sold Elsewhere \$3.75**

### Greening (Rhode Island Greening).

(Winter.) This apple has a recognized standing, both in domestic and foreign markets, at a selling price of good prices. It is regarded as the very best cooking apple grown and also excellent for dessert use. Skin yellowish green and also excellent for dessert use. Skin yellowish, firm, fine grained, crisp, tender, juicy, subacid, subacid, very good. Skin greenish green to yellow, sometimes with brownish-red bluish. Tree large, vigorous, strong, wide spreading. Ripens in December, lasts until April. Price: Large 35 cents, medium 30 cents, small 25 cents each.

Green's Nursery Co., 143 North Main St., Rochester, N. Y. Leaf a 1-1 this year, and a 2-1 this year. For more information, call or write to the above address. Method of packing: C. E. Gorton, West Hill, N. Y., 1917, p. 8, 1917.

McIntosh Red Apples as Grown at Green's  
Fruit Farm

**McIntosh Red.** (Early Winter.) One of the best apples. The flesh is very tender, perfumed and delicious. Fruit large, firm, fine, crisp, tender, very juicy, perfumed, slightly subacid. Skin whitish yellow almost completely covered with bright red and carmine. Tree vigorous and hardy. Sells for highest prices in big city markets. "If I were to plant only four apple trees, one of them would be McIntosh Red," says C. A. Green. Ripens in October to December or later. Price: Large 35 cents, medium 30 cents, small 25 cents each.

**Red Astrachan.** (Summer.) A reliable cropper that comes into bearing young. Fruit medium size, crisp, tender, juicy, subacid. Skin pale yellow striped with deep crimson, covered with a distinct bluish bloom. Tree medium size, vigorous and hardy. Ripens in July, lasts until September. Price: Large 35 cents, medium 30 cents, small 25 cents each.

Mr. C. A. Green: The orchard I ordered from you five years this spring is doing fine. Several apple trees bore a few fine apples. Also peaches are in bearing. Green's Nursery for me always for true to name fruit and courteous treatment. CHAS. WAKLEY, Aurora, Indiana, February 3, 1917.

**Northern Spy.** (Winter.) This variety ranks next to Baldwin and R. J. Greening in importance. It is a fine apple for culinary use and its exceptionally fine flavor makes it invaluable as a dessert apple. Fruit very

large, rather firm, very tender, crisp, very juicy, subacid. Skin pale yellow, nearly concealed with bright pinkish red and mottled with carmine. Tree large, vigorous and hardy. Season, November to April. "Perfect Spies sell at \$8.00 and up per barrel." C. A. Green. Price: Large 35 cents, medium 30 cents, small 25 cents each.

Northern Spy, Winter

**WESTERN NEW YORK FRUITS.** I call attention to the matter of fruit sales this season. Strawberries, raspberries, blackberries, currants and gooseberries have been in big demand, producers have not been able to supply the demand and prices have been higher than for many seasons. Cherries sold at high prices. Pears at one-half to one cent per pound higher than usual. Plums at unusually high prices, and early apples at about 50 per cent higher than in most seasons.

**Wealthy.** (Winter.) This variety is particularly valuable for cold climates because the tree is hardy and the fruit sells well, and is good in quality for either dessert or culinary uses. Fruit large, fine, crisp, tender, very juicy, agreeably subacid. Skin pale yellow, blushed and marked with narrow stripes and splashes of red, deepening to brilliant red. Prevailing effect "bright red." Price: Large 35 cents, medium 30 cents, small 25 cents each.

Parcel post shipments are not intended for nearby orders. They save money for long shipments. Express is safer and quicker than freight shipment.

**Duchess of Oldenburg.** (Fall.) Very valuable because of its great hardiness. Fruit large, firm, crisp, tender, juicy, subacid. Skin pale yellow, striped with red. Tree medium size, vigorous and hardy. Ripens late in August and early in September. Price: Large 35 cents, medium 30 cents, small 25 cents each.

Duchess of  
Oldenburg

			.30	2.50	

PARCEL POST—These trees are so large they cannot be sent by parcel post. For trees by parcel post, see page 56.

**Delicious Red Apple.** (Winter.) Everybody interested in fruit has heard of the Delicious apple. There are a few varieties which have attracted wider attention. Though most extensively grown in the West, it has proved successful in the eastern and middle states. It is attractive in shape and color and of delicious quality. The color of the skin is bright red. The flesh is yellow, crisp and juicy with a delightful aroma. It is a good keeper and shipper. It is said to be very hardy and a vigorous grower. If you have once seen a Delicious, you will never forget its shape, which is elongated with ribbed surface at the blossom end and with long stem and deep cavity. Everyone will want to plant a few Delicious. Price: Large 40 cents, medium 35 cents, small 30 cents each.

As to the great new apple Delicious, Luther Burbank says: "It is a gem, the finest apple in the world." He says that with him it has never failed to produce a crop, and that the quality is unsurpassed. It is a wide step away from the ordinary apple. It is reported that \$1,350 has been received for the fruit of one acre of Delicious apple trees.

**Pound Sweet (Pumpkin Sweet).** (Winter.) By many it is considered the best sweet variety of its season for baking, canning or stewing with quinces. Fruit very large, crisp, decidedly sweet with a peculiar flavor. Skin clear yellow marbled with greenish-yellow. Tree large, vigorous and hardy. Ripens in October, lasts until January. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**Fameuse.** (Snow.) (Fall.) The most desirable dessert apple of its season. Fruit red, deepening to almost purplish black in highly colored specimens. Ripens in October, lasts to midwinter. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**Yellow Transparent.** (Summer.) One of the best extra early varieties. Excellent for both culinary use and dessert. Fruit large, crisp, tender, juicy, subacid. Skin yellowish-white. Tree medium size, vigorous and hardy. Ripens late July and August. Price: Large 40 cents, medium 35 cents, small 30 cents each.

The Superior Green's Improved Baldwin

**Green's Improved Baldwin.** (Winter.) Brighter and better quality than old Baldwin. Tree more vigorous grower. Discovered by C. A. Green. Flesh tender, delicious. It is hardly necessary to speak in praise of this apple. Its fame is widespread over this continent. It succeeds best in the middle and eastern states. There is no more productive apple known the world over than the Baldwin. I have picked twelve barrels from a single tree near my dwelling. Others claim to have gathered even larger yields than this. It stands shipment well and is a long keeper. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**Tolman Sweet.** (Winter.) An attractive yellow sweet apple, much esteemed for culinary purposes, as pickling, boiling and baking. Fruit medium size, moderately juicy and decidedly sweet. Skin color pale yellow, sometimes blushed. Tree vigorous, long lived and hardy. Ripens in November, lasts to April. Price: Large 40 cents, medium 35 cents, small 30 cents each.

If you have already received a copy of this catalog, kindly hand this copy to a friend or neighbor.

**Wismer's Dessert.** (Winter.) Of Canadian origin. The tree is hardy, vigorous and productive, and the fruit medium to large, yellow shaded and striped with bright red. The flesh mild subacid, of excellent flavor and exceedingly fine, tender texture. A very high quality dessert apple. Price: Large 40 cents, medium 35 cents, small 30 cents each.

Deal with successful men. There is a reason for their having succeeded. It is almost impossible for a man to succeed without giving good service.

**Fall Pippin.** (Holland or Pound Pippin.) Very large, roundish-oblong; yellow, tender, rich and delicious; tree a good grower and regular, abundant bearer. Ripens in October and lasts until December. The old favorite, large light colored fall variety without which no home orchard is complete. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**Jonathan.** (Winter.) This is a decidedly attractive apple, being predominantly of a bright red color. Great apple of the west and northwestern states. Succeeds everywhere. Fruit firm, tender and very crisp, very juicy, mild subacid, of good quality. Skin smooth and glossy, whitish yellow overspread with bright red and splashed with deep carmine. Tree vigorous. Ripens in November, lasts until April. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**Sweet Bough.** (Summer.) This is a universal favorite for the home orchard. Fruit large, moderately firm, crisp, tender, juicy, sweet. Skin smooth, pale greenish yellow, sometimes blushed. Tree vigorous, long lived. Season August to early September. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**York Imperial (Johnson's Fine Winter).** (Winter.) This is one of the leading commercial varieties of the Middle Atlantic states. Fruit large, firm, crisp, moderately juicy, mild subacid or nearly sweet. Skin green or yellow, covered with light red and striped with carmine. Tree vigorous and hardy. Ripens in January, lasts until April or May. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**Starr.** (Starr apple is a much improved harvest apple.) (Summer.) This is one of C. A. Green's favorite harvest apples, delicious, beautiful and a great bearer. Fruit very large. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**Alexander.** (Fall.) A very large, attractive red or striped apple, medium to good in quality, and very desirable for culinary uses. Hardy, vigorous and moderately productive. Season, September and October. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**Twenty Ounce.** (Fall.) Fruit very large. Price: Large size 40 cents, medium size 35 cents, small size 30 cents each.

Blenheim Orange Apple

Wolf River—Hardy

Shiawassee Beauty Apple—Hardy

**Blenheim Orange.** (Sometimes called Lord Nelson.) (Winter.) An excellent variety both for dessert and culinary uses. Fruit very large and attractive in appearance. Skin moderately thin, and rather bright red. Flesh tinged with yellow, firm, moderately juicy, crisp, subacid. Very good in quality, excellent either for dessert or culinary uses. At Green's Fruit Farm 4 trees of this variety yielded 40 barrels of first class apples. Season October to December and later. Price: Large 40 cents, medium 35 cents, small 30 cents each. (Early Winter.)

**Wolf River.** (Winter.) Fruit large, firm, juicy, subacid. Skin pale bright yellow, mottled and blushed with bright deep red. Tree large, vigorous, hardy. Ripens in September, lasts until December. Price: Large 40 cents, medium 35 cents, small 30 cents each.

PRICES ARE FREE ON BOARD CARS AT ROCHESTER, N. Y.

**Bismarck.** (Winter.) Fruit very large, attractive in color. Skin yellow, becoming solid dark red on the exposed cheek. Flesh firm, tender, juicy, subacid. The tree is dwarfish, comes into bearing very young. Season October to early winter. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**Maiden's Blush.** (Fall.) A very beautiful apple, valued especially for market and culinary uses. It makes very white evaporated stock. Fruit large, moderately crisp, tender, very juicy, subacid. Skin pale waxen yellow with crimson blush. Tree medium size, vigorous and hardy. Ripens in September, lasts to November or December. Price: Large 40 cents, medium 35 cents, small 30 cents each.

Live and let live prices in this catalog are as low as good trees can be grown and sold. Everything that enters into the cost of trees has increased in cost.

**Roxbury Russet.** (Winter.) The most popular russet apple. Fruit large, firm, moderately tender, juicy, sprightly, subacid, good. Skin almost smooth but usually covered with greenish to yellowish brown russet. Tree medium to large, vigorous and hardy. Season December to May. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**Winesap.** (Winter.) A well known popular dark red variety of medium size, firm, crisp, juicy, subacid. Ripens in January, lasts to June. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**Shiawassee.** (Winter.) An apple of unusually fine quality and flavor, C. A. Green's favorite dessert apple. The fruit is from medium to large in size, a pale yellow, entirely overspread with attractive red in color. Flesh is white, crisp and juicy, with a very pleasant sprightly subacid taste. Considered one of the finest, if not the finest, flavored apple. The tree is very hardy, vigorous, healthy and long lived. Season October to January. Price: Large 40 cents, medium 35 cents, small 30 cents each.

#### Planting Fruit Trees by the Roadside

In this country tree planting has not been frequently made, as in Europe, for the reason that land is so cheap in the United States. The time has come for our people to consider this measure, which will greatly add to the beauty of our rural highways and be a source of revenue at slight expense.

The soil close to the fences on either side of our public roads is far more fertile on the average than the soil of our fields, therefore if you plant fruit trees close to the fence and care for them the first few years, loosening up the sod once or twice during the year within a radius of two or three feet around each tree, the trees will soon care for themselves and yield abundant crops of attractive and saleable fruit.

Some may argue that those who travel the highway would carry off the fruit, but such is not the fact where the experiment has been tried. Those traveling by respect the enterprise of the man who has done so much to beautify the landscape.

The tree most suitable for this highway planting is first of all the apple. A roadway lined with apple trees is a beautiful sight at all seasons of the year, particularly when in blossom or when laden with tinted fruit. If late fall or winter varieties of apples are planted, surely no one will pick them to eat, for they would not be ripe. But cherry trees are no less attractive. There are few farms in this country which do not have sufficient front on the highway to afford a good place for the planting of from 100 to 200 fruit trees.

**Fruit for Health**—"An apple a day will keep the doctor away."

The healthfulness of fruits is well known, but they have not been used as widely in the past as they should. Their beneficial properties stimulate the appetite and aid digestion and are a necessary part of every diet. Too many people are prone to consider fruits as luxuries rather than necessities. Growing children often crave fruits of different kinds, and would be benefited by more of them, but their parents, feeling that they are luxuries, fail to provide them. In addition to their other good qualities, fresh fruits are said to "make other foods more efficient," something that is worth while considering.—State Agricultural College, Colorado.

Transcendent Crab Apples

**Transcendent Crab.** (Winter.) This beautiful fruit has for many years been one of the most popular of the Crab Apples. Fruit medium to rather large roundish to roundish oblong. Flesh yellow, crisp bright yellow with bright red check overspread with bloom. Highly colored specimens are nearly covered with bright red. Tree is a good grower, hardy and usually very productive, yielding good to very heavy crops annually. Ripens in late August, lasts to middle of September. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**Hyslop Crab.** (Summer.) Fruit large, very brilliantly colored, borne in clusters, firm, subacid. Tree vigorous, hardy and a reliable cropper. Ripens in late September and October. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**SLOW FOLKS.** Why have the people of this country been so slow, so dilatory, in planting an abundance of fruit vines, plants and trees around their homes? One reason for this lack of planting is the fact that tree agents' prices for trees, etc., have been exceptionally high and that a poor or a man of moderate means has not been able to buy at such high prices.

Now there is no excuse, for Green's Nursery Company, of Rochester, N. Y., have established a new method by which a man who desires to plant vines and trees can deal direct with the producing nurseryman and thereby secure his trees at about one-half the price that nursery agents have been charging. This has been accomplished by a new method. These prices could not have been secured through the tree agency business as practiced of old, for the selling of trees through agents is expensive and cannot be conducted in successful competition with the new method inaugurated by Green's Nursery Company, which consists of sending your order direct to the nursery which grows the trees. This saves an enormous expense which otherwise would be paid to tree agents, who get commissions on every sale and whose expenses in traveling through the country are great. The marvel of the age is the low prices at which these fruit trees, etc., can now be produced directly from the man who grows and produces those trees.

Half a million people purchased trees of Green's Nursery Company and have planted them successfully. These trees are now fruiting in every state and territory of this great country.

**Gravenstein.** (Fall.) Orange yellow with stripes of light and dark red; tender, juicy, aromatic, subacid. Good size and attractive appearance. Ripens late in September, lasts to early November. Price: Large 40 cents, medium 35 cents, small 30 cents each.

**YOU SAY YOU HAVE NO PLACE FOR FRUIT TREES.**—But you have. Plant through the center of your garden a hedge row (trees 3 feet apart) of dwarf pear, cherry, peach, or dwarf apple trees. Or a row of raspberries, grape vines, or a row of mixed fruit. Such a row takes up but little room. After you see the result of this one row you will plant other rows. I advise shearing off the tips of all the branches on fruit tree hedge rows every year, at any season. If done when in leaf this pruning will induce early fruiting.

John Burroughs says:—"The apple is the commonest and yet the most varied and beautiful of fruits. A dish of them is as becoming to the centerable in winter as was the vase of flowers in summer. An apple is a rose when it ripens. It pleases every sense to which it can be addressed, the touch, the smell, the sight, the taste; and when it falls in the still October days it pleases the ear. It is a call to a banquet, it is a signal that the feast is ready. The bough would fain hold it, but it can now assert its independence; it can now live a life of its own."

**Grimes' Golden.** (Winter.) Attractive in form and excellent either for dessert or culinary use. Fruit large, firm, tender, crisp, juicy, rich, aromatic, subacid. Skin clear deep yellow with scattering pale yellow or russet dots. Tree vigorous. Ripens in November, lasts to February. Price: Large 40 cents, medium 35 cents, small 30 cents each.

## Green's Apple Collection No. 2

6 Splendid 5 to 7 ft. Apple Trees for \$2.00

2 Green's Baldwin      1 Northern Spy  
1 Winter Banana      1 R. I. Greening  
1 C. A. Green's Selection

Special price \$2.00 (Sold elsewhere \$3.00)

Mr. C. A. Green: The orchard I ordered from you five years ago this spring is doing fine. Several apple trees bore a few fine apples. The peaches also are in bearing. Green's Nursery for me always for tree to name fruit and courteous treatment. CHAS. WARELY, West Lebanon, Ind., February 8, 1917.

## Rare List of C. A. Green's Apples as Grown in his Specimen Orchard

Here is a list of rare valuable apples not widely known through the entire country. We do not have so large a supply of trees of these rare kinds as we do of those varieties more widely known and more generally planted. This list is valuable to those planting in fruit gardens rather than for commercial purposes. Price: 40 cents for medium size, XX, or 50 cents for largest size, XXX.

✓ Fanny (Fall)	Gano (Winter)
Spitzenburg (Winter)	Black Ben Davis (Winter)
Yellow Bellflower (Winter)	Carolina Red June (Summer)
Chenango Strawberry (Fall)	Gillflower (Winter)
Martha Crab (Fall)	Melon (Winter)
Mother (Fall)	Opalescent (Winter)
Senator (Winter)	Kentish Fillbasket (Fall)
Gloria Mundi (Fall)	Gideon (Fall)

Green's Nursery Co.: I have over 200 of your trees. Have had some fine Elberta peaches off my three-year-old trees this season. Would not think of planting anything but Green's trees. My red raspberries I got from you last spring produced some fine berries. GUS SCHREIBER, Columbus, May 25, 1917.

## VARIETIES OF APPLES TO PLANT

There are thousands of varieties of apples. For a home garden, you should have varieties that ripen continuously from the earliest to the latest, but you should not attempt to have very many varieties for a profitable commercial orchard. Select those varieties which have done best in your locality. Charles A. Green and the various State Experimental Stations recommend about the following list of apples for planting in the different states named below. Other varieties succeed there, but those named are the leaders.

For Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, Ohio, Indiana, Michigan, New Jersey, Delaware, Maryland, Virginia, West Virginia, Kentucky, Tennessee, Arkansas, Oklahoma, Kansas, Missouri, Illinois, Iowa, Wisconsin and Minnesota:

American Blush  
Baldwin  
Ben Davis  
Duchess of Oldenburg  
Fameuse or Snow  
Gravenstein  
Green's Baldwin

Grimes' Golden  
Hubbardston Nonesuch  
Jonathan  
King of Tompkins County

Northern Spy  
Pound Sweet

Red Astrachan  
Rhode Island Greening  
Rome Beauty  
Shiawasse Beauty  
Stayman's Winesap  
Transcendent Crab  
Wagener

Wealthy  
Winesap  
Winter Banana  
Wisner's Dessert  
Yellow Transparent  
York Imperial

## DWARF APPLES

Dwarf apples commence bearing fruit the second year after planting; and as they do not attain as large a size as standard trees, they are especially desirable for village or city gardens. The big advantage of these dwarf trees is that they do not attain a size any greater than peach, plum, etc., and this makes them very desirable for gardens in the city where space is limited. Heretofore city people have been obliged to buy all their apples, because the size of their garden plot would not enable them to plant standard trees on account of the amount of space these standard trees required. These dwarf trees bear when very young and bear abundantly. You can go out into your own fruit garden and pick fruit from trees of your own growing and eat it when in the freshest condition. These dwarf trees open a new avenue to people who have gardens of a limited size.

Dwarf apple trees are produced by budding or grafting on dwarf growing roots or stock. The fruit they produce is just as large and of just as good quality as that of standard trees, the only difference between standard and dwarf trees being in the size of the trees. All varieties do not thrive on dwarf roots, so do not order varieties not given on the list below. The usual distance for garden and commercial planting is 10 ft. apart each way, but dwarf apple trees can be planted in hedge rows, the same as dwarf pears, and can be set as near together as 3 or 4 ft. When planting this way, the trees only grow in two directions. They make a beautiful, ornamental and profitable hedge row. For descriptions of varieties of dwarf apples we refer you to descriptions given in the preceding pages of standard apple trees.

### LIST OF DWARF APPLES

Green's Baldwin	Winter Banana
Duchess of Oldenburg	Fameuse
McIntosh	Opalescent
Red Astrachan	Wealthy

Trees Bear Very Young

### PRICES OF DWARF APPLE TREES

	Each	10 of one kind
Large Size, 3½ to 5 ft.	\$0.50	\$4.50
Medium Size, 3 to 4 ft.	.40	3.50

### REASONS WHY YOU SHOULD PLANT TREES AND VINES

1st. Because fruits are not only economical but are necessary to the health of your family and yourself. You cannot be long lived without them in abundance. They are nature's medicines if eaten fresh picked from your garden.

2d. Because fruits will lighten the burdens of your good wife. She desires variety and beauty on her table. Fruits accomplish this inexpensively. What is more beautiful or appetizing?

3d. Fruits make home attractive to the children. If you thus make home attractive, their temptations will be less. In after life the fruit garden is never forgotten—"The orchard, the meadow, the deep tangled woodl."

4th. Every man desires to do something for posterity, for those who come after him. We desire to build a monument before death calls. Some build churches, some cemeteries, others railroads or canals. I would plant trees. The trees we plant will not only enrich ourselves but will beautify the earth and refresh mankind long after our bodies are turned to dust.

Elberta Peaches—Noted for Size, Beauty and Productiveness

## PEACH TREES

Peach trees can be grown on any land that will grow a good crop of corn or potatoes, but will do better on a sandy loam in preference to a heavy clay soil. To secure heavy, vigorous and healthy trees the ground should be kept clean and mellow and should receive an occasional dressing of wood ashes. They should also be pruned yearly, all the dead and useless wood cut out, and the light and air let in.

The trees should be planted 16 feet apart each way, and at this distance 170 trees will be required for each acre.

Peach trees make very desirable fillers in an apple orchard. They come into bearing when very young and will pay for the care and maintenance of the apple trees and net a handsome profit besides; and by the time the apple trees need the room, they will have borne full crop and can be dug up without loss. We secure buds from bearing trees which insure their being true to name.

### PRICE OF PEACH TREES (EXCEPT WHERE OTHERWISE NOTED)

	Each	10 of one kind	100

Medium size, 3½ ft. to 4½ ft., XX.....	.25	2.00	15.00

### PRICE OF THE NEW AND VALUABLE ROCHESTER AND HALE PEACH TREES

	Each	10 of one kind
Large size, 4½ ft. and up, XXX.....	\$0.60	\$5.00
Medium size, 3½ ft. to 4½ ft., XX.....	.50	4.00
Small Size, X.....	.40	3.50

### PRICE OF VAN DEMAN, CROSBY, GREENSBORO, BEER'S SMOCK, AND YELLOW ST. JOHN PEACH TREES, 40 CENTS EACH

PARCEL POST—These trees are too large to be sent by parcel post. For trees by parcel post, see page 56.

### Elberta.

One of the great peaches of the earth. (Free-stone.) Ripens here early in September, following closely up on Early Crawford. A beautiful, extra large golden yellow peach, with a brilliant red cheek, firm, juicy, high flavored, rich and sweet. This is the best commercial variety, of which more have been planted and from which more money has been made than any other variety. For years it has been the standard market variety, and its place in the estimation of commercial growers would be hard to fill with any other variety, for no other peach has yet been introduced that will fill all the requirements of a commercial peach with such success as the Elberta. In addition to its high quality, large size and attractive appearance, the Elberta has a tough skin and consequently does not bruise easily and ships exceedingly well. Elberta remains the peer of all commercial peaches, and from present indications will hold this place undisputed. Price: Large size, 30 cents; medium size, 25 cents each.

We have smaller sized peach trees mostly Elberta, Early and Late Crawford, Hale and Rochester, some Niagara and others, on which we will make pen prices on application.

Three acres of peaches, 150 trees to acre, bore 2,700 baskets in one season, sold through commission house at \$1.00 per basket, yielding \$900 per acre. Elberta peaches from Green's Trees, says H. W. Cobb, Glen Rock, N. J.

An old patron writes: "Three acres of Elbertas—450 trees—produced 2,700 baskets, which I sold for \$1.00 per basket, or \$2,700.00—which is \$900.00 per acre."

## HAVE YOU HEARD ABOUT THE WONDERFUL ROCHESTER PEACH?

*It is the Greatest Peach of the Age*

SEE COLORED PLATE ON FIRST COVER PAGE OF THIS CATALOG

Why is this new peach, the Rochester, most valuable?

The answer is because it is the earliest of all large yellow freestone peaches. It is the peach that fruit men have long been looking for. It is the only one of its class.

Rochester Peach is of high quality. It is a good shipper. It is a good keeper. Market men like to handle it because it holds up well.

It fruits early and heavily soon after planting.

It is a handsome peach. Deep yellow with bright crimson blush; its flesh is deep yellow with red next to the stone. It is a freestone peach.

It is something new in early peaches.

**Rochester.** Very valuable. (Earliest Freestone.) (See front cover for colored plate.) The Rochester is a new, very early, yellow fleshed peach of the Crawford type. Ripens here the middle of August, Rochester has accomplished something notable. It has produced a new peach which is better in quality, more productive, more hardy in bud than any that have gone before. This is saying much, for there are many varieties of peaches. This new peach is called the Rochester peach. It has not been introduced with flourish of trumpets or with advertising. Almost the first we hear of it, it appears in our local markets by many wagon loads, outstripping all others of its season and out-selling all in price. Market men seek the Rochester peach not only for its large size, its beauty, its deep yellow flesh tinged with red next to the stone, and its beautiful bright cheek, but for the further reason that it is a good keeper. Strange to relate, although the skin is tough, when the

Rochester peach is dead ripe, you can peel off the skin much the same as is done at the canneries after dipping the peach in lye. It is of high quality.

The Rochester peach bears fruit at a very early age. We drove out to the adjacent peach orchards and found trees two years old heavily laden with beautiful peaches. It is of the Crawford type, resembling the Crawford and the new Hale peach in appearance, but is earlier than Earl Crawford, even earlier than Carman. When peach growers in all other states become familiar with the Rochester peach, they will plant it for market and home use. (See front cover of this Catalog for colored plate of Rochester yellow, the earliest early peach.)

CHAS. A. GREEN

Price of Rochester Peach Trees: Large size, \$6.00; medium size, 50 cent; small size, 40 cent each.

This photograph tells how home sales of Rochester peach and other fruits and farm supplies may be sold at home on the farm in front of the farm house. Hundreds of carloads of fruits have thus been sold directly to the consumer the past year

**Crawford's Early.** (Yellow Freestone.) A magnificent large yellow peach of good quality. Tree vigorous and prolific; its size, beauty, and productiveness make it one of the most popular varieties. Season beginning of September. This valuable peach has long been a favorite for large size, beauty and quality of fruit. Most people when they buy peaches, ask for Crawford's, knowing but little about any other variety. In past years this was the earliest peach, but now much earlier kinds are known, hence it is about mid-season in ripening. Everybody who plants peach trees plants Crawford's Early. It should not be omitted from your order. Price: Large size, 30 cents; medium size, 25 cents each.

#### PLANTING THE PEACH

In planting peach trees every branch should be removed and the top cut back so as to leave a straight stick about 3 ft. high. Some would say cut it back to 2 ft. high, but I think 3 ft. is a better height. Whether you are planting one peach tree or a thousand do not fail to cut off the branches as I have indicated, no matter how unreasonable it may seem to you, for this is the experience of all peach growers.

The peach tree is liable to overbear, therefore it is good practice to cut off half of the past season's growth on bearing trees. The result of this pruning is to remove a portion of the fruit buds and to make the head of the tree more compact and less liable to break down with its burden of fruit. While a gravelly or sandy soil is considered the best for peach trees, I have succeeded with the peach on a clayey loam. Tenacious clay that cracks during the hot weather of summer is not good soil for the peach. The peach will not prosper with wet feet, therefore, the soil should be drained either naturally or artificially.

**Crosby Frost-proof Peach.** (Hardy Yellow Freestone.) Price: 40 cents each.

One dollar used to buy trees for home supply is worth over \$5.00 to \$10.00. \$5.00 thus used is worth over \$25.00 at a modest estimate. You would not sell a fruitful apple, pear or cherry tree when in bearing for \$50.00 or even \$100.00, which you can buy now of Green for 20 or 30 cents.

**Niagara.** (Freestone.) Ripens here September 1st. A new yellow flesh variety of unusually large size and attractive appearance. Fruit a beautiful golden yellow blushed with brilliant red. Resembles the Elberta, but is larger in size. It has been thoroughly tested by extensive orchard planting near Rochester, N. Y., and found to be an unusually fine commercial variety. The quality and flavor of this peach are exceptional. The trees are good, strong, vigorous growers. The foliage is almost the character of leather, and for this reason the Niagara is almost immune to fungus diseases. It is a good bearer. Prof. Van Deman says: "I have heard the Niagara peach spoken of in the highest terms. Those who have fruited it are enthusiastic over Niagara peach. I have seen and eaten Niagara. It is of large size, beautiful, and better in quality than Elberta." Price: Large size, 30 cents; medium size, 25 cents each.

**Champion.** (Freestone.) Fruit large, sweet, rich and juicy; skin creamy white, with red cheek, freestone and a good shipper. Ripens early. Hardy and productive. Price: Large size, 30 cents; medium size, 25 cents each.

#### PLANT MORE SMALL FRUITS

Less plantations of small fruits have been made during the last few years than formerly. The result is that prices of red and black raspberries, blackberries, strawberries and other small fruits have greatly increased all over the country. The prices for these berries now make it exceedingly profitable to produce them. The truth is, there are not enough grown to supply the demand. Bear in mind that the canning houses are consuming a large quantity of small fruits. They are using far more than in past years for jams, marmalades, for canning and for fruit juices. Another new source of consumption of small fruits is in the great factories that manufacture fruit syrup for soda fountains. While these new sources enter the field as competitors in purchasing small fruits, the supply from families who patronize the groceries continues.

Those who have planted or are about to plant an orchard may well consider the importance of planting small fruits between the rows of young trees or in a plantation by themselves. These small fruits will come quickly into bearing and give the planter much needed revenue while he is waiting for his orchard to come into bearing. Small fruits are the poor man's berries. The poor man can secure ready money from a little patch of strawberries or raspberries, blackberries or grapes in his garden, or from currants and gooseberries. There are some parts of the country where apples, pears and peaches cannot be grown owing to the severity of the winters, but even in these latitudes the strawberry will succeed by giving it a slight winter protection of straw litter or straw manure. The currant, gooseberry and grape are the hardiest of the other small fruits for northern localities.

Hale Peaches—A Notable New Variety

**Hale (New Yellow).** (Freestone.) This notable new variety of peach is very large in size and is globular in shape. In color it is a deep, golden yellow overlaid with bright carmine. The skin is thick, smooth and without fuzz and is tightly drawn over the solid flesh. The flesh is deep yellow, fine grained, firm, tender and with a very delicious flavor. It is of the Early Crawford type, ripening a little later than Early Crawford and about a week ahead of Elberta. The trees are strong, vigorous growers and are unusually hardy. Reports indicate that due to its solid flesh it is an exceedingly good shipper, and great things are expected of this new Hale peach as a commercial variety. Valuable also for the home garden. Price of Hale peach trees: Large size, 60 cents; medium size, 50 cents; small size, 40 cents each.

Mr. Charles A. Green: I gave an order to an agent a number of years ago for 800 peach trees and they proved a total loss. I ordered 800 from C. A. Green, and the third season they yielded a lovely crop. I have ordered all my stock of Green's Nursery Co. ever since. JOHN A. EVERTS, Mesick, Mich., October 16, 1917.

**Van Deman.** Very early yellow freestone. Price: 40 cents each.

Rochester this season.

Eight thousand cars of peaches look like a big crop. Over 8,000 cars of this delicious fruit will be shipped out of

**Carman Peach.** (Stone nearly free.) Large size, like Elberta in shape, of a creamy white yellow, skin covered with deep bluish, skin tough, enduring shipment, flesh tender, excellent flavor, very juicy, one of the hardest and most popular early varieties. Price: Large size, 30 cents; medium size, 25 cents each.

**RIPE PEACHES**

I know how ripe peaches look when they are sunning themselves in August and September among the bright green foliage. I know how to tell when the peaches hang fully ripe upon the trees, for they are always ripe when you find the wasps and bees feeding upon their juices. Do not tempt me with peaches that were picked when hard and green and shipped to the eastern states, though they may look bright and tempting, for I know that these peaches cannot compare with those that hang fully ripened upon the trees in my kitchen garden. I like to split one of these ripe garden peaches in halves and notice the beauty of the interior, the white or the yellow skin in contrast with the crimson stains of the fruit where it comes in contact with the pit, but I do not waste much time in admiration for I am continually tempted to bite into this divided package of nectar and swallow its juices. I know how a boy looks when eating the dead ripe peaches that I am telling you about, for I have been there.

**Greensboro.** A very early peach. Price: 40 cents each.

For order sheet and index see last pages of this catalog.

**Beer's Smock.** Very large, flesh yellow, freestone. Price: 40 cents each.

**Yellow Saint John.** Large yellow freestone. Price: 40 cents each.

**Crawford's Late.** (Freestone.) Ripens here the best late sorts. Superb in size and shape; splendid yellow with dark red cheeks; flesh deep yellow, juicy and melting, rich, winy flavor. Tree vigorous, hardy, and productive. Does not overbear, no thinning of fruit is necessary with this variety. It brings the highest prices because it ripens at a time when the early peaches are gone. It is eagerly sought by canners. It always reaches the market in good condition as it is an unusually fine keeper and shipper. Price: Large size, 30 cents; medium size, 25 cents each.

**Apricots.** Well headed hardy apricot tree. Price: 40 cents each.

**PARCEL POST**—We make a specialty of peach trees by parcel post. See page 56 for full list of varieties and prices. Parcel post trees are particularly recommended for distant states. A number of orchards along the Pacific Coast have been set with Green's parcel post trees.

# PEAR TREES

BOTH STANDARD AND DWARF

PRICE OF STANDARD PEARS—EXCEPT BOSCH

	Each	10 of one kind	100
Large size, 5 to 7 ft., XXX	\$0 35	\$2 75	\$22 50
Medium size, 4½ to 6 ft., XX	25	2 00	17 50
Small size, 4 to 5 ft., X	20	1 75	13 50

PARCEL POST—These trees are too large to send by parcel post. For trees by parcel post, see page 56.

PRICE OF DWARF PEAR TREES

	Each	10 of one kind	100
Large size, 3½ to 5 ft., XXX	\$0 30	\$2 50	\$17 50
Medium size, 3 to 4 ft., XX	20	1 75	12 50

PARCEL POST—These trees are too large to send by parcel post. For trees by parcel post see page 56.

Bartlett Pear

**Bartlett.** We offer Standard and Dwarf Bartlett—It is the most popular pear, both for home use and market, that the world has ever known. It is buttery and melting, with a rich flavor. The tree is vigorous in growth. Many people remove half of the fruit in August, ripening this for market, thus relieving the tree of its strain and securing larger fruit from that which remains on the tree.

It is a leader among canning pears and when well grown is a universal favorite and commands top prices. It will begin to bear in three years and in about seven years will produce a bushel of fruit per tree. Season September.

## NINETY-THREE BARTLETT PEAR TREES PAID FOR TEN-ACRE FARM IN TWO YEARS

After standing idle for ten years, this ten-acre farm on which this Bartlett pear orchard is located, was bought for \$1,000.00. The new owner believes in thorough cultivation, spraying and pruning, and began work on the orchard at once. A second year later the fruit from the 93 trees in the orchard sold for \$500.00, or one-half the cost of the entire farm. At the distance these trees were set apart, it would require 135 to cover an acre, which makes the income per acre approximately \$750.00. *Two-thirds of an acre of Bartlett pear trees on this ten-acre farm in two years paid for the entire ten acres.*

We can make you a bargain price on Dwarf Pears and Standard Pears if you will tell us how many, what kinds and sizes.

Mr. C. A. Green: I buy practically all my nursery stock from you and have had splendid success. ALBERT W. HALL, Leominster, Mass., March 17, 1917.

**Worden-Seckel.** (Standard and Dwarf.) This beautiful and delicious pear attracted wide attention when introduced recently. In quality it is rated very high. A seedling of the Seckel, which for many years has been conceded to be the standard of excellence. Equal in quality to its famous parent, which it much resembles in flavor, is equally as luscious, more juicy, and with an aroma equally as rich and inviting, while in size, color, form and appearance it is decidedly superior. Grown under like conditions, it will average a half larger. Tree a more upright and rapid grower than Seckel; hardy and an enormous bearer; fruit keeps well, retaining its quality to the last. October.

Green's Nursery Co.: My recent order of trees and shrubs received, planted, pruned and growing. I want to express my gratification with the quality of trees and shrubs sent me. They appear to set me ahead about one year. They were carefully dug and well packed. CHAS. E. ALBRIGHT, Columbus, Ohio, May 25, 1917.

**Sheldon.** (Standard only.) A better autumn pear does not exist. First quality; large, round, russet and red, melting, rich and delicious. As a standard should be more largely planted. Season October and November.

Parcel Post Stock is our smallest size, but good thrifty stock. Express and freight are our best or larger grades.

PRICES ARE FREE ON BOARD CARS AT ROCHESTER, N. Y.

**Gans Early.** Standard—A fine new early pear, ripening just after Tyson and a week to ten days before Bartlett. It is large and handsome, pyriform in shape, color yellow, with slightly brownish check. Flesh fine grained, melting, very juicy, sweet, sugary, quality very good. It shows no tendency to rot at the core. Tree a vigorous grower. Season September.

**Dwarf Pears.** (Largest.) There is no fruit tree that can be dwarfed so successfully and with such good results as the pear. Dwarf apple trees are not expected to bear larger or finer fruit than ordinary apple trees, but dwarf pear trees under good culture generally produce specimens superior to those grown on standard trees under the same culture and treatment. It is difficult to state why a dwarf pear tree should bear larger Bartlett or Seckel pears than standard trees, but such I believe to be the fact.

**Flemish Beauty.** (Standard and Dwarf.) A large, beautiful, melting, sweet pear. Tree very hardy, vigorous and fruitful. Flesh is tender, juicy and highly flavored. Season September and October.

### Green's New Standard Pear Collection No. 5

10 Selected Trees 4½ to 6 ft. high at \$2.30

6 Bartlett  
1 Seckel

1 Anjou  
2 Clapp's Favorite

Special Price \$2.30 (Sold Elsewhere \$3.00)

Rochester, Y. Y., has long had the reputation for producing the hardest vines and trees. We have plenty of moisture but not the heat that produces a succulent or second growth liable to be winter killed; the growth here made in our trees is slow and enduring and the wood is well ripened preparatory to the hardships of winter.

Beurre Bosc Pears—Highest Quality

**Bosc.** (Beurre Bosc.) Standard only. Very large, a beautiful russet colored pear, with a very distinct shape, having a very long neck, of very high quality having a distinct rather melting, buttery flavor. This pear is generally conceded to be a very high quality pear. It is a good grower, but on account of being difficult to propagate in the nursery row is seldom offered for sale by nurseries. No home fruit garden is complete without this variety. Our supply is limited. We grow it as a standard tree only, as it does not do well when grown as a dwarf on quince root. October first, I picked three bushels of Bosc pears from a tree in my garden hedge row, all trees only three feet high in row. Price: Large size, XXX, 75 cents each, \$3.00 per 10. Medium size, XX, 60 cents each, \$5.00 per 10. Small size, X, 40 cents each, \$3.50 per 10.

**Anjou**, valuable and profitable early winter pear, of high quality. A great producer. One of C. A. Green's favorite dessert pears. We picked wagon loads of pears from trees planted along border of fence row

**Anjou.** (Beurre d'Anjou.) (Standard and Dwarf.) A large, handsome pear, buttery and melting, with sprightly vinous flavor; keeps into mid-winter. Tree a vigorous grower and a good bearer. Many claim that this is the greatest of late autumn pears. It keeps until January with special care. It is beautiful in shape and color. Season October and November.

"Canners and dryers are offering to contract up to five years in advance for crops, and they even offer to contract for crops of fruit, the trees for which have not yet been planted. All this has given a boom to the nursery business so that local men will be cleaned out and our eastern friends will get a great business from the west this year," says C. E. Leith.

**Seckel.** (Standard and Dwarf.) Small size, yellowish russet with a red cheek. Flesh whitish, buttery, very juicy and melting with a peculiarly rich, spicy flavor and aroma. This pear has a world wide reputation for quality and productiveness. Fruit of Seckel and Bartlett Pears sold this season at \$5 to \$8 per bbl. We are planting 300 Seckel Pear Trees for the fruit. September and October.

## Green's Dwarf Pear Collection No. 6

6 Splendid 4 to 5 ft. Dwarf Trees for \$1.60

1 Anjou 1 Clapp's Favorite 2 Duchess  
1 Bartlett 1 Seckel

Special Price \$1.60 (Sold Elsewhere \$2.50)

High prices for labor and for everything entering into the business of tree growing have greatly increased, thus higher prices must come.

Green has a national reputation for selling trees TRUE TO NAME. There are many thousand orchards in every part of this country which give evidence of the fact that our vines, plants and trees are TRUE TO NAME

### THAT DWARF PEAR HEDGE

There are many things about fruit growing that are but little known. One of these is that fruit trees can be planted 2 to 3 feet apart in the row through the garden or even closer together with remarkable results in the way of fruit production.

I was taught this fact by seeing apples and pears, especially dwarf pear trees, bearing fruit abundantly in the nursery rows, where the trees stood only 6 inches apart, and where there were other rows within three and a half feet on either side.

I went through a nursery this fall where the trees 3 to 4 years old stood closely in the rows and bore the most beautiful specimens of Duchess apple that I have seen. But dwarf pear trees are the ones that thrive best in this close planting in a single row across the garden, bearing soonest and most abundantly.

Six years ago I planted a row of dwarf pears across my garden, each tree being 2 to 3 feet apart in the row. There was no other row of trees near this, the garden being occupied with flowers, vegetables and strawberries. These pear trees began to bear the second and third year and have borne marvelously every year with the exception of occasionally here and there a tree which skipped that year. The trees are Duchess, Bartlett, Seckel, Howell, Lawrence. Each year I cut back the tops of these trees with the Levin Grape Pruner, cutting back the present growth more than one-half and thinning out the superfluous branches, thus keeping the trees low headed. Had I not cut back the branches the trees would have been 10 feet high, whereas now they are only 5 feet high.

I have secured the most beautiful specimens of pears on these trees and fruit of large size free from blemish. The pear trees this day do not seem crowded in the row. This row of dwarf pear trees occupies scarcely any space in the garden and does not interfere with plowing.

Good Old Bartlett Pear

Popular Duchess Pear

Clapp's Favorite Pear

**Duchess Pear.** (Duchesse d'Angoulême)—Standard and Dwarf—The Duchess dwarf pear trees give uniformly large crops of pears of marvelous size and good quality. What the Bartlett pear is as a standard fruit or for cooking. Season, October and November.

**Kieffer.** (Standard and Dwarf.) The Kieffer has many admirers on account of its great productiveness each year, splendid growth and selling well in market. For the home market it will be a favorite for eating. Season, October and November.

**Clapp's Favorite.** (Standard and Dwarf.) A profitable early variety; a prolific and early bearer. This is without doubt the most productive pear in cultivation. Brings big money at Green's Fruit Farm. Season August, earlier than Bartlett.

#### CLAPP'S FAVORITE PEAR GROWN IN HEDGE ROW

In the hedge row of pear trees extending across our garden, most of the trees being about three feet apart, there is one tree of Clapp's Favorite pear from which we have just picked, September 13th, three bushels of beautiful pears. This variety is an abundant bearer of unblemished fruit which meets with a ready sale. It has few competitors as it ripens about a week earlier than Bartlett. I pick these pears before they are dead ripe. No pear should be left upon the tree until it is yellow and soft.

Yesterday I drove by the pear orchards of a noted grower near this city. One of these pear orchards was in grass without any cultivation. The other was cultivated ground. Both these orchards are productive. The fruit in sod ground without cultivation is not quite so large as that on cultivated ground, but the trees are remarkably productive on both cultivated and uncultivated land.

**THE BEST VARIETIES TO PLANT.** There are hundreds of varieties of apples, peaches, pears, plums, cherries, currants, paeonies, plibos, in fact all kinds of fruits and ornamentals. Some nurseries offer all these numerous varieties without knowing whether they are good varieties or not. We have a large experimental orchard and farm where these varieties are tried on a large scale. The varieties that are offered in our catalog are the ones that we have found to be the best. They are the result of many years of careful selection. Confine your attention to this catalog and you will be getting only the best varieties.

A TREE IS KNOWN BY ITS FRUIT AND SO IN THE CASE OF PEAR TREES. GREEN'S TREES HAVE QUALITY AND ARE WORTHY TO NAME AND MEN WHO HAVE RECEIVED TREES OF GREEN'S NURSERY OF ROCHESTER, N. Y. HAVE MADE THE TEST THIRTY YEARS.

### Green's New Standard Pear Collection No. 5

10 Selected Trees 4½ to 6 ft. high at \$2.30

6 Bartlett  
1 Seckel

1 Anjou  
2 Clapp's Favorite

Special Price \$2.30 (Sold Elsewhere \$3.00)

**Wilder Early.** (Standard and Dwarf.) Pleases all because beautiful, red and yellow. It is a good grower and produces a crop early. Season early August.

**WILDER EARLY PEAR.**—This is the earliest good pear. C. A. Green says so, and he ought to know for he first sent it out. He was the introducer. Possibly you never ate a Wilder Early pear. Lots of people have not. It is delicious. It melts in the mouth. It is a rare delicacy. It is a beautiful pear with gold on one side and crimson on the other side. As a dwarf pear it bears fruit at an early age, soon after planting. I favor the dwarf pear for the home garden. It occupies but little space. The ends of all branches should be sheared off each year in July. If not sheared thus in July, do it in winter any time.

DWARF  
PEAR  
TREES

## THE DWARF PEAR HEDGE

PLENTY OF FRUIT, SMALL  
COST, TAKES UP LITTLE  
ROOM

Our C. A. Green has discovered the dwarf pear hedge. He found it by noticing that dwarf pear trees in the nursery row, standing three feet apart bore beautiful specimens of pears bountifully for many years. Mr. Green planted twelve years ago a row of dwarf pear trees, each three feet apart, running across the center of his vegetable garden. These little pear trees have thrived amazingly and have borne bountiful crops each year, and in blossom and fruit have attracted wide attention. For such a hedge C. A. Green advises planting the following varieties of dwarf pears:

Duchess	Wilder
Clapp's Favorite	Seckel
Bartlett	Anjou
Worden Seckel	Gans
Flemish Beauty	Kieffer
Lawrence	

### Lawrence.

Late Winter Pear—Standard and Dwarf—Size medium to large, obovate, golden yellow, flesh melting, with a pleasant aromatic flavor. Tree a moderate grower and abundant bearer. Season Mid-winter.

### Green's Dwarf Pear Collection No. 7

10 Splendid 3 to 4 ft. Dwarf Trees for \$1.85

2 Anjou	2 Duchess
3 Bartlett	2 Seckel
1 Clapp's Favorite	

Special Price \$1.85

(Sold Elsewhere \$2.25)

#### Dwarf Pear Trees by Parcel Post

We have some fine trees, well rooted and branched, which we can send postage prepaid for 20c. each. See page 56.

#### Would not take \$1000 for his Dwarf Pear Hedge

Dear Mr. Green: I accepted your advice twelve years ago and planted a hedge of dwarf pear trees around my garden. They have lived and have been bearing fruit abundantly every year. I would not take \$1,000 for these 120 dwarf pear trees, planted on either side for sunshine and ventilation.—CHAS. A. SIRINGO, Santa Fe, New Mexico.

Grown as Dwarf Pear Tree Hedge (Worden Seckel, New, Best Quality Pear)

## PLUM TREES

### PRICE OF PLUM TREES

Large size, 5 to 7 ft., XXX  
 Medium size, 4½ to 6 ft., XX

Each	10	
	of one kind	100
\$0 40	\$3 50	\$30 00
.35	3 00	25 00

**York State.** It is one of the largest, best in quality and most productive of all prunes or plums. Size large; color dark blue, covered with purple bluish; flesh yellow and delicious; freestone, ripening the last week in September at Rochester, N. Y. York State Prune is a vigorous grower, and is healthy and hardy here at Rochester. It is prune shaped, good size and a splendid seller.

**OUR YORK STATE PRUNE CROP** sold the past season at \$2.00 per bushel on the public market. Plant York State Prunes for profit. Price: Large size, 40 cents; medium size, 35 cents each.

**German Prune.** Medium, oval, purple or blue, juicy, rich, fine. Tree vigorous and very productive; one of the best. September. Sells for higher prices in market on account of high quality. A leading favorite. Price: Large size, 40 cents; medium size, 35 cents each.

**Shropshire Damson.** This variety is a universal favorite because it is enormously productive. The fruit is of good size and, while in no sense a dessert plum, may be eaten out of the hand with relish when fully ripe or after a light frost. This old variety is one of the best of its kind for culinary purposes. Season of ripening late and long. Price: Large size, 40 cents; medium size, 35 cents each.

**Abundance.** Fruit large, showy, beautiful. Amber, turning to a rich, bright cherry color, with a decided white bloom, and highly perfumed. Flesh light yellow, exceedingly juicy and tender, of a delicious sweetness, impossible to describe. Stone small and parts readily from flesh. For canning it is of greatest excellence. Its season is very early, ripening in advance of other plums, thus adding to its special value. Price: Large size, 40 cents; medium size, 35 cents each.

**Reine Claude.** (Bavay's Greengage.) Medium size, greenish, fine flavor. Not surpassed in quality, beauty or size. September. Price: Large size, 40 cents; medium size, 35 cents each.

**Grand Duke.** This is probably the best late shipping plum and is popular on account of its large size, its prune shape, handsome plum-purple color and firm, meaty flesh; a regular and abundant bearer and unusually free from rot. Price: Large size, 40 cents; medium size, 35 cents each.

Mr. C. A. Green: I buy practically all my nursery stock from you and have had splendid success. ALBERT W. HALL, Leominster, Mass., March 17, 1917.

**Blue Damson.** This is the old-fashioned damson so well known to our forefathers; blue in color, medium in size; prized very highly for canning and preserving. Ripens late in the season. Price: Large size, 40 cents; medium size, 35 cents each.

**Climax.** Its extreme earliness, immense size, high color, delicious flavor and fragrance place it in the lead among early shipping plums. Tree vigorous and remarkably productive. Price: Large size, 40 cents; medium size, 35 cents each.

York State Prunes

PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

**Lombard Plums—Very Productive**

**Lombard Plum.** Lombard is a great favorite. The tree adapts itself to any locality, it is extremely hardy, producing good crops where many other varieties will not grow; it is a strong growing tree and exceedingly productive. It is a handsome reddish plum, flesh yellow, juicy and pleasant. An excellent variety, and should be planted in all gardens and orchards. Price: Large size, 40 cents; medium size, 35 cents each.

**Bradshaw.** A very large and fine early plum, dark reddish purple, juicy and good. Trees erect, very hardy, and vigorous; very productive; valuable for market. The quality is excellent, and it is destined to become one of the most popular of all plums for canning, while its attractive color, good quality and shipping properties will cause it to be sought for as a market variety. It ripens ten days to two weeks later than Abundance. Price: Large size, 40 cents; medium size, 35 cents each.

**PARCEL POST**—We have plum trees that can be sent by parcel post. See page 56.

## QUINCE TREES

**Green's Orange Quince** is large, roundish, bright golden yellow, cooks tender and is of excellent flavor. Valuable for preserves or flavoring, very productive, the most popular and extensively cultivated of the old varieties. Good for home use and for market. It is so late in blossoming that there is no danger from frost. Season September and October. This is by far the best variety of quince. There are some varieties that are recognized as standards on account of their superiority. For example, Baldwin in apples, Bartlett in pears, Elberta in peaches, and along with these the Orange takes its place as the undisputed leader of all varieties. No fruit that we know of is so certain to produce a full crop every season. There is always a good demand for quinces, as they are not grown extensively. After having tested at Green's Fruit Farm many kinds of quinces we have decided that so far there is no better quince than the genuine old fashioned Orange quince. There are, however, different strains. We have been propagating the best strain that we can find, calling it Green's Orange quince. These trees produce beautiful fruit of large size and fine quality. Price: Large size, 4 to 6 ft., XXX, 50 cents each; \$4.50 per 10; medium size, 3 to 4 ft., XX, 40 cents each; \$3.50 per 10.

**Parcel Post**—We have no quince trees that can be sent by parcel post.

**Niagara.** This is a very early plum, and valuable for this reason. It is reddish purple, large size, making an attractive appearance in market, and possesses good shipping qualities. It bears enormous crops of fruit with great regularity. Price: Large size, 40 cents; medium size, 35 cents each.

If you have already received a copy of this catalog, kindly hand this copy to a friend or neighbor.

**The Great Burbank Plum**

**Burbank.** (Japan Plum.) Unsurpassed for beauty and productiveness, as well as great hardiness of tree. Fruit large, oval, often with a slight neck; skin reddish purple; flesh yellow, juicy and good. Its beauty and value as a market variety are unsurpassed. Several years' trial has proved it to be hardy in almost the entire United States. They bear abundantly at an early age. The fruit is exceedingly beautiful, of fair quality, and is especially desirable for canning. It ripens in midseason. Price: Large size, 40 cents; medium size, 35 cents each.

**Orange Quince**

## CHERRY TREES

### Prices of Black, Red and White Sweet Varieties:

	Each	10 of one kind	100
Large size, 5 to 7 ft., XXX	\$0 45	\$4 00	\$35 00
Medium size, 4½ to 6 ft., XX	40	3 50	30 00

### BLACK AND RED SWEET VARIETIES

**Green's Black Tartarian Cherry.** Fruit of the largest size; flesh dark, half tender, with a peculiar liver-like consistency. July. Price: Large size, 45 cents; medium size, 40 cents each.

**Bing Cherry.** Very large size, almost black in color when ripe, of fine quality, very productive, a good shipper. Price: Large size, 45 cents; medium size, 40 cents each.

**Napoleon Bigarreau.** (Royal Ann.) Skin pale yellow, richly dotted with deep red. June. Price: Large size, 45 cents; medium size, 40 cents each.

**Windsor Cherry.** Fruit large, roundish, oblong, very firm, juicy, mottled red; flesh pinkish. Quality good, heavy bearer. Fruits for a long season. Price: Large size, 45 cents; medium size, 40 cents each.

**Governor Wood.** A rich and delicious large red cherry that hangs well on the tree. Very popular. June. Price: Large size, 45 cents; medium size, 40 cents each.

OUR SATISFIED CUSTOMERS ARE OUR BEST ADVERTISEMENT. ASK THOSE WHO HAVE PLANTED OUR TREES.

Aside from their culinary attractions and from their taste when first picked from the trees, cherries are among the beautiful objects, therefore the cherry tree in blossom is an attraction to every garden, but more beautiful are the blushing fruits glistening in the summer sun, inviting all who pass to partake freely without price.

Which are your favorite cherries? I am asked. You will find my choice in the varieties named below:

**Black Tartarian** is not surpassed.

**Bing** and **Lambert** are two new cherries of great value.

**Early Richmond** is one of the oldest favorites.

**English Morello** has surprised all who have planted it.

**Montmorency** has been pronounced king of the red cherries, as **Yellow Spanish** is of the lighterskinned.

**Early Richmond** for early, **Montmorency** for late, and **English Morello** for very late, makes a long cherry season.

**Lambert Cherry.** One of the largest of all sweet cherries. Color dark red; flesh solid; an excellent shipper. Price: Large size, 45 cents; medium size, 40 cents each.

**Yellow Spanish.** One of the popular light colored varieties. Fruit large, pale yellow with a bright red cheek; flesh firm, juicy and rich. Tree vigorous and an excellent bearer. July. Price: Large size, 45 cents; medium size, 40 cents each.

### Prices of Red, Acid or Sour Varieties:

	Each	10 of one kind	100
Large size, 5 ft. and up, XXX	\$0 40	\$3 50	\$30 00
Medium size, 4 to 5 ft., XX	35	3 00	25 00

### RED, ACID OR SOUR VARIETIES

**Montmorency.** "King" of cherries. It is hardy, reliable and productive. In great demand by canning factories. More money has been made with it than with any other variety. Large, bright shining red, acid, midseason. June. Price: Large size, 40 cents; medium size, 35 cents each.

**Early Richmond.** This fruit does not ripen upon the trees and can be left without picking longer than most varieties. Unsurpassed for hardness and cooking purposes, a great bearer. June. Price: Large size, 40 cents; medium size, 35 cents each.

**English Morello.** One of the varieties that seem to succeed well with neglect. Fruit dark red, quality good, rich acid flavor, late. Price: Large size, 40 cents; medium size, 35 cents each.

PARCEL POST—We have cherry trees that can be sent by parcel post. See page 56.

**Worden (Black)**  
Price 15 cents each

**Lucile (Red)**  
Price 25 cents each

**Niagara (White)**  
Price 15 cents each

**Concord (Black)**  
Price 15 cents each

## GRAPE VINES

**Niagara.** (White.) This is the leading American white grape, holding the rank among the grapes of this color the Concord does among the black varieties. Bunch very large and handsome, often shouldered, compact; berries large, round; skin thin, tough, does not crack and carries well; has not much pulp when fully ripe; melting, sweet. This variety is prized by many on account of its foxy taste and aroma. The Niagara makes a handsome and showy fruit and for this reason sells very readily on the market, commanding a good price. Vines vigorous and very productive. It is likely that the Niagara will continue for some time to be the leading white grape for the market as long as grape consumers demand a handsome, showy grape to be had at a low price. Fruit ripens about midseason with Concord. Price of strong 2-year-old vines, 15 cents each; \$1.25 per 10; \$10.00 per 100.

**Concord.** (Black.) This is the leading black variety and the most widely grown grape on this continent. In New York state approximately 75 per cent. of all the grapes grown are Concord alone. It succeeds on a greater number of soils than any other variety. Bunch large, shouldered, compact; berries large, covered with a rich bloom; skin tender but sufficiently firm to carry well to distant markets; flesh juicy, sweet, pulp tender; vines very vigorous, hardy, healthy, usually productive of very heavy crops. Fruit ripens in midseason with the Niagara. Grape juice is made almost entirely from Concord, and owing to the productiveness of this variety it can be produced so cheaply that no other grape can compete with it either for this purpose or as a market variety. Price of strong 2-year vines, 15 cents each; \$1.00 per 10; \$6.00 per 100.

**Worden.** (Black.) This is a seedling of the Concord and the fruit is of better quality, it is not as good a keeper and does not ship as well to distant markets. It is a superior variety for home use and for nearby markets, and on account of its high quality and large size usually brings a higher price than Concord. For home use we know of no grape of greater value. Fruit ripens one or two weeks earlier than Concord. Bunches large, shouldered, compact; berries large, round, dark purplish black, covered with heavy blue bloom; skin of average thickness; flesh juicy, slightly foxy in taste, very good in quality; vine vigorous, hardy, healthy and productive, yielding as heavy crops as Concord. Price of strong 2-year vines, 15 cents each; \$1.25 per 10; \$8.00 per 100.

**Lucile.** (Red.) In vigor, health, hardiness and productiveness this variety is not surpassed by any other. Its crops exceed those of Concord and it has never been known to winter kill in the grape regions of New York; its fruit and foliage are very nearly immune to fungal; bunches and berries medium to large; skin thin but tough; bright in color. This variety is a good shipper, the flesh is pulpy, quality is good with an exceedingly pleasing foxy flavor. Price of strong 2-year-old vines, 25 cents each; \$2.00 per 10; \$15.00 per 100.

Green's Nursery Co.: Two years ago I bought of your firm a bill of trees and vines and am very much pleased with them. My grape vines were loaded this season. Had quite a lot of cherries. The plum and pear trees are too young to bear. A. J. DANIELS, Kinsman, Ohio, October 26, 1917.

Mr. Green Inspecting Our Field of One-Year-Old Grape Vines

**Campbell's Early.** (Black.) An early black variety valued for the large size and attractive appearance of both bunch and berry. It is a good shipper and a good keeper, very desirable for the home garden, but as it is not particularly productive is not grown extensively for market. Fruit ripens somewhat earlier than Worden; bunches large, shouldered, compact; berries large, dark purplish black with blue bloom; skin thin and tough; flesh juicy and of good quality; vines vigorous and hardy. **Price of strong 2-year vines, 25 cents each; \$2.00 per 10; \$15.00 per 100.**

**Eaton.** (Black.) Berries large, fair in quality with distinct foxy taste. **Price: 25 cents each; \$2.00 per 10; \$15.00 per 100.**

**Regal.** (Red.) If you want the longest keeping grape, one that you can eat during the fall and winter months, plant the Regal. It is of superior quality and flavor. Owing to its tough skin and persistent nature it is an exceptionally good shipper. Fruit ripens in midseason; bunches medium in size; berries above medium, purplish red; flesh very juicy, slightly musky in flavor, of very good quality; vines vigorous, hardy, healthy and very productive. **Price of strong 2-year vines, 25 cents each; \$2.00 per 10; \$12.00 per 100.**

**Delaware.** (Red.) This is the highest quality American grape grown and is prized on account of its extreme hardiness. It will grow and produce fruit in sections where all but the most hardy vines will fail. It is a good shipper, and being red in color is very attractive. Its faults are: the small size of the vine, slowness of growth and the small size of the berries. Its particularly high quality and pleasing flavor offset its faults and make it a variety highly esteemed, especially for planting in the home garden. Fruit ripens a few days earlier than Concord. **Price of strong 2-year vines, 20 cents each; \$1.25 per 10; \$7.50 per 100.**

Green's Nursery Co.: I wish to tell you how fine the collection of grapes has done and is doing, which I purchased from you about one year ago. We had all the grapes we wanted to eat from them besides giving some away. We were told they would not grow here, but that is a mistake. CHARLES E. COX, Clearwater, Florida, August 22, 1917.

**McPike.** (Black.) Fruit ripens with Concord; flesh very juicy, tender, fair to good in quality; vines vigorous and hardy. **Price of strong 2-year vines, 25 cents each; \$2.00 per 10; \$15.00 per 100.**

PARCEL POST.—Grape vines can be sent by parcel post, postage prepaid, for 2 cents per vine extra. See page 56.

**Brighton.** (Red.) This is a handsome, high quality, red grape, very desirable for the home garden and nearby market, but on account of its poor shipping qualities is not recommended for a distant market. Fruit ripens a little earlier than Concord; bunches large, shouldered; berries large, dark red; flesh tender, juicy, melting, very good in quality; vines vigorous and hardy, producing good crops. **Price of strong 2-year vines, 25 cents each; \$2.00 per 10; \$15.00 per 100.**

### Green's Grape Collection No. 10

**10 Splendid Two Year Old Vines for \$1.25**

3 Concord—Black      1 Moore's Diamond—White  
1 Regal—Red        2 Niagara—White  
3 Worden—Purple

**Special Price \$1.25. (Sold Elsewhere \$2.00)**

This Grape Collection can be sent by parcel post if 15 cents is added to the price.

Diamond High Grade White Grape

**Diamond.** (White.) A beautiful, high quality, white grape, rivaling the Niagara in popularity. It is higher in quality than the Niagara but not quite as productive. Fruit ripens slightly earlier than Niagara; bunches medium in size, shouldered, compact; berries above medium size, yellowish-white in color, melting, very good in quality; vines vigorous and hardy and productive. **Price of strong 2-year vines, 25 cents each; \$2.00 per 10; \$15.00 per 100.**

## RASPBERRY BUSHES

**Plum Farmer.** (Black.) Do you know that this is one of the largest and best of the blackcap raspberries? At Green's Fruit Farm it has not been surpassed in size or productiveness. It ripens early and quickly. The fruit is of enormously large size, often measuring an inch in diameter. It sells at the highest price. Price: 50 cents per 10, 75 cents per 25, \$2.00 per 100, \$17.50 per 1,000.

**Kansas Black Raspberry.** Is of the largest size, vigorous, healthy and productive. Fruit is large and excellent in quality. We have fruited it several seasons and find it an excellent variety. Price: 50 cents per 10, 75 cents per 25, \$2.00 per 100, \$17.50 per 1,000.

### **Scarff Mammoth Black Raspberry.**

A very productive variety of black raspberry, absolutely hardy. Canes free from disease and strong upright growers, a trifle larger in size than Cumberland. Price: 75 cents per 10, \$1.00 per 25, \$3.00 per 100, \$30.00 per 1,000.

**Cuthbert Red.** Large, Productive, Attractive. It yields bountifully of large and beautiful bright red berries, which are easily picked and command good prices. Price: 50 cents per 10, 75 cents per 25, \$1.50 per 100, \$15.00 per 1,000.

**Cumberland.** Fruit very large, firm, keeps and ships as well as any of the blacks. Mid-season. Price: 50 cents per 10, 75 cents per 25, \$2.00 per 100, \$17.50 per 1,000.

**Columbian.** A strong grower, unexcelled for productiveness and desirable for canning. At Green's Fruit Farm nine rows, 150 feet long, yielded 66 bushels. Color, reddish purple. Price: 50 cents per 10, 75 cents per 25, \$2.00 per 100, \$17.50 per 1,000.

PARCEL POST—Raspberries can be sent by parcel post, postage prepaid, for one-half cent per bush extra. See page 56.

**Herbert.** (Red.) Not excelled as the hardiest, most beautiful red raspberry. It originated in Canada, and has withstood without injury 40 degrees below zero. The cane of the Herbert is very strong and vigorous; the leaves large and healthy; it is claimed never to have been affected with diseases of any kind. Fruit oblong, very bright red, largest of all. It is firm, sweet, subacid, juicy, and of good flavor, quality very good. Season begins a few days before Cuthbert. An exceptionally fine variety both for garden and commercial planting.

New York State Experiment Station says: "It is twenty-five years since the Herbert red raspberry came to light and it has been grown more or less in New York for ten years, yet in this time it has not attained the popularity it deserves." Price: 75 cents per 10, \$1.25 per 25, \$3.00 per 100, \$25.00 per 1,000.

**St. Regis (Ranere).** This is one of the most notable everbearing red raspberries ever introduced. It commences to ripen early and continues to fruit until fall. The fruit is a bright crimson color of large size, rich and sweet, with the wild raspberry flavor so much desired. The flesh is firm, making it a good shipping variety. It is marvelously prolific. The foliage is thrifty, vigorous and enduring. Price: 75 cents per 10, \$1.50 per 25, \$4.00 per 100.

### PLANTING THE RASPBERRY

Most failures with raspberries are due to the planting of the tip or germ of black caps too deep. This white tip or germ, which contains the vitality of the plant, is found at the juncture of the cane and the root, and should be put just below the level of the soil, point up, with a covering of half an inch only of loose soil over the top. If this tip or germ is buried deeply, your planting may be a failure. Red raspberry plants may be planted deeper than the tip plants of black raspberry.

# BLACKBERRY BUSHES

Blowers—Mammoth Blackberry

**Blowers Blackberry.** "The Giant of all Blackberries." A large clean bright berry of exceptionally good quality, with no perceptible core when fully developed. The fruit is sweet, the flavor is pleasant without being peculiar. This is a first-class shipper, standing up well in the market for several days. The season of ripening is from the middle of July until frost, with the bulk of the crop maturing in August. It is a hardy variety. It has endured 20 degrees below zero. The bushes are upright growers, are very hardy and enormously productive. One single plant has the record of producing 2,600 berries. One of our patrons writes that his plantation of Blowers blackberries averaged over \$300.00 per acre. Price for superior plants grown from root cuttings, worth twice as much as ordinary plants: 50 cents per 10, \$1.00 per 25, \$3.00 per 100, \$25.00 per 1,000.

Have you heard the song "In Berry Picking Time?" There is a romance connected with berry growing, as well as hard common sense.

**Eldorado Blackberry.** This variety has with us never winter-killed, or failed to produce a full crop of the finest fruit. The vines are vigorous and hardy. Berries are very large, jet black, borne in large clusters, and ripen well together; are very sweet, melting, pleasing to the taste, have no hard core, and keep eight to ten days. C. A. Green. Price: 60 cents per 10, \$1.25 per 25, \$3.50 per 100, \$30.00 per 1000.

**Snyder Blackberry.** This popular, hardy and profitable blackberry is known everywhere and planted largely. Where some other varieties have entirely failed, it proved itself entirely hardy. It is also grown in localities where hardiness is not the first consideration, because of its productiveness and general adaptability to all localities. Not the largest. With good culture it is large enough to satisfy all. The severest frost does not bite it. Season early; oblong oval in form; quality good. Price: 50 cents per 10, \$1.00 per 25, \$3.00 per 100, \$25.00 per 1000.

Snyder—Hardy Blackberry

**Green's New Hardy Blackberry.** This blackberry was discovered by our superintendent about ten years ago. We have since been fruiting it at Green's Fruit Farm and testing it. It has proved to be large, hardy, productive, vigorous and desirable in every way. It is of high quality, tender to the core. Price: 20 cents each, \$1.25 per 10.

Green has a national reputation for selling trees TRUE TO NAME. There are many thousand orchards in every part of this country which give evidence of the fact that our vines, plants and trees are TRUE TO NAME.

PARCEL POST—Blackberries can be sent by parcel post, postage prepaid, for one-half cent per bush extra. See page 56.

Blackberries require large space to develop properly, and to give opportunity to cultivate and pick. The rows should not be less than eight feet apart, with the plants about three feet apart in the rows.

Do you know that blackberries are the best yielders of the cane fruits, averaging 3,000 to 4,000 quart's per acre, and the fruit sells from 8 to 15 cents per quart? If planted between the rows of young trees in an orchard, they will pay expenses in bringing the orchard to maturity. They will produce fruit two seasons after planting. They do best on deep, well drained soil, inclining to sand, but will do well on any soil that will grow a good crop of corn or potatoes.

Prices are made and orders accepted on basis of our estimate of stock we will have, and should I fall short on our estimates and be unable to complete any order, no responsibility of any nature is to be attached to ourselves. Our instructions are given in our enclosing manner of shipment we will use our own judgment. Please return to us any profit on the sale.

**Red Cross**  
Sweetest Currant  
Ever Produced

Our two-year No. 2 currant plants are Good Selected Bushes

We have seen lots of so called No. 1 not any better

"A photograph of Red Cross as grown by us"

**Red Cross Currant.** Do you know that Red Cross is the sweetest currant ever produced? It is natural to connect sourness with all red currants, since, as a rule, red currants are exceedingly acid, but Red Cross currant is an exception to the ordinary rule, being the sweetest currant. In making currant jellies, or in preparing currants in other ways, remember the Red Cross currant requires only half the sugar that many other currants require owing to its natural sweetness and fine flavor. **Price:** Extra large 2-year-old No. 1 bushes, 8 cents each, 60 cents per 10, \$4.00 per 100, \$25.00 per 1,000. Strong 2-year-old No. 2 bushes, 6 cents each, 50 cents per 10, \$3.00 per 100, \$15.00 per 1,000.

**White Grape Currant.** This is the best of all white currants. **Price:** Strong 2-year-old No. 1 bushes, 10 cents each, 75 cents per 10, \$5.00 per 100.

**Perfection Currant.** It is an upright, strong grower, thickly covered with clusters of large fruit. **Price:** Strong 2-year-old bushes, 15 cents each, \$1.10 per 10.

**Wilder.** One of the strongest growers and most productive. Bunch and berries very large, bright, attractive red color. Ripens at the same time as Fay's. **Price:** Strong 2-year-old No. 1 bushes, 10 cents each, 75 cents per 10, \$5.00 per 100.

**Fay's Prolific.** Of large size, fine flavor, red in color. Universally recommended by those who have had experience with it. **Price:** Strong 2-year-old No. 1 bushes, 10 cents each, 75 cents per 10, \$5.00 per 100.

**Diploma Currant.** (New Gold Medal)—The best and largest of all currants. Very vigorous grower and most productive red currant. Season medium late.—C. A. GREEN.

W. C. Barry says Diploma currant is large, solid and of good quality. It will be valuable for its size and solidity.

Prof. H. E. Van Deman says: Diploma currant was exhibited by Jacob Moore at the Pan-Am., 1901. I was a judge of the first exhibit there. It was my duty and pleasure to examine carefully five baskets of this currant, sent at different dates for a month, some on branches as grown. Diploma currant is of attractive appearance, both clusters and berries being very large. The quality is good. It is a currant of unusual promise.

Brown and Brother say: We have tested Diploma currant on the table with sugar, and find it of delicious flavor. Considering its extra large size, productiveness and quality, it must become a valuable variety. **Price:** Strong 2-year-old No. 1 bushes, 10 cents each, 75 cents per 10, \$5.00 per 100, \$35.00 per 1,000. Strong 2-year-old No. 2 bushes 6 cents each, 50 cents per 10, \$4.00 per 100, \$25.00 per 1,000.

Our Diploma and Red Cross fruit sold this past season at \$140.00 per ton for the bulk, the balance at close of season at \$180.00 and \$200.00 per ton on the Rochester market. Tell us where you can plant any farm crop that will pay half as well.

PARCEL POST—Strong 2-year-old No. 2 bushes can be sent by parcel post, postage prepaid, for 1 cent per bush extra. See page 56.

Downing Gooseberries

## GOOSEBERRY BUSHES

**Downing Gooseberry.** Do you know that its value lies in its productiveness, fine quality, beautiful appearance, vigorous growth, and freedom from mildew? It is recommended as proof against mildew. Free from spines, of a transparent color, tending to yellow; bush upright, keeping the fruit from the sand. Enormously productive and unsurpassed for canning. It is easily harvested by stripping the branches with a gloved hand, enabling the picker to gather many bushels in a day. The winnowing of leaves is done by an ordinary fanning mill, the same as beans. They can be shipped from Maine to California like marbles. We recommend planting them between the rows of trees in an orchard. They will pay the expense of bringing it to maturity. If gooseberries are planted for home use alone, the fruit will remain on the bushes in nice condition for several weeks and can be picked as needed.—C. A. Green. **Price: 2-year-old bushes, first class, 8 cents each, 50 cents per 10, \$4.00 per 100, \$30.00 per 1,000. 1-year-old bushes, 5 cents each, 40 cents per 10, \$3.00 per 100, \$20.00 per 1,000.**

**Chautauqua Gooseberry.** Very large, one of the best. Superior quality and very productive. **Price: 25 cents each, \$2.25 per 10.**

Green's Nursery Co.: Enclosed please find check and order for trees. I have been buying Green's Nursery stock and recommending it to my friends and neighbors for the last 20 years. I have never found any better or equal for the price and quality. H. W. Gettz, Llanerch, Pa., October 24, 1917.

**Red Jacket.** Very large. **Price: 10 cents each, 60 cents per 10.**

Green's business has been done from the start on a cash basis, patrons sending cash with order. We could not have sold superior stock at the low prices we offer by any other method than this cash method.

You can pay the expense of bringing your orchard into bearing by planting gooseberry bushes between the rows of trees. Or you can keep your family well supplied with fresh or preserved fruits by planting a few bushes in your garden.

Gooseberries are the second earliest fruit ready for market. The demand is constantly increasing as more are being preserved every year. The returns from gooseberries are very satisfactory, as the expense of cultivation is light. Two-year-old bushes the third year after planting should produce 200 bushels per acre, increasing to 400 bushels the fifth year. Gooseberries do best on a cool, damp, rich soil, and should be pruned each spring so as to give the new wood a chance.

**PARCEL POST**—Gooseberry bushes can be sent by parcel post, postage prepaid, for 2 cents per bush extra. See page 50.

Apple and Pear Orchard and Home Supply of Small Fruits

The Two Best Strawberries are Corsican and Dunlap

## STRAWBERRY PLANTS

**Corsican Strawberry.** (Perfect flowering.) Mid-season. Biggest berry on earth. This is C. A. Green's favorite strawberry. It is the biggest, the brightest and best in color; a great yielder and producer. The foliage is exceedingly vigorous and leathery, resisting fungus, drought, weeds, and even neglect of cultivation. At our exhibit at New York State Fair, a fruit grower stood in front of our sign, which read, "A patron writes us that he has made \$590.00 per acre from strawberries." We thought that possibly he thought this was an exaggeration, but in reply to our inquiry to that effect, he stated that he did not think we told half the story and that he was making \$1,000.00 per acre from his strawberries. There are thousands of varieties of strawberries; we only name a few of the very selected ones which have been fully tried out and tested and found to be the best. All of them are perfect flowering, and do not need another variety planted with them. Price of Corsican, layer plants, 25 cents per 10, 40 cents per 25, 65 cents per 50, \$1.25 per 100, \$5.00 per 1000.

**Superb.** Everbearing. (Perfect flowering.) This is considered the best of the fall or everbearing varieties. Price of Superb, layer plants, 75 cents per 10, \$1.10 per 25, \$1.50 per 50, \$3.00 per 100.

**Brandywine.** (Perfect flowering.) A late and firm berry, a good shipper, good canner. Blossom perfect, fruit large, of good form, bright red all over and good quality. Price of Brandywine, layer plants, 25 cents per 10, 40 cents per 25, 65 cents per 50, \$1.25 per 100.

### FALL AND SUMMER PLANTING

We receive a lot of inquiries for strawberry plants for setting in the summer and fall. We believe as a rule, strawberries planted in the summer and fall do not give satisfaction unless pot-grown plants are set, and these plants are so expensive to produce that we do not grow them any more. We recommend planting strawberries in the spring.

### Senator Dunlap Strawberry.

(Perfect flowering.) Early. A heavy cropper of best quality berries with clean, healthy foliage which has no tendency to rust. Berries are very large. Plants of this variety must not be expected as large as Corsican plants as it is a lighter grower. The strawberry is truly the "Poor man's berry." Planted between the rows of trees in an orchard, strawberry plants will pay the expense of bringing the orchard into fruiting and in most cases net a good profit besides. In one short year after planting, strawberries come into full fruiting, returning the capital invested and a very liberal profit in cash besides. Price of Senator Dunlap, layer plants, 25 cents per 10, 40 cents per 25, 65 cents per 50, \$1.25 per 100, \$5.00 per 1000.

**A PROFITABLE STRAWBERRY BED.**—A well known woman in western New York has a strawberry bed which comprises four rows of strawberry plants running across her small garden. This year after supplying her family with strawberries, she has sold \$40.00 worth of berries from this bed. She did the picking herself. She is delighted with strawberry growing so far as she has progressed.

**OUR STRAWBERRY PLANTS** will be fresh dug. We guarantee them to reach you in good condition, and if not in good condition you must report within 24 hours, otherwise no attention will be paid to the complaint. Many do not succeed with plants owing to poor planting, and for this we are not responsible.

**IMPORTANT.**—Strawberries are too perishable to ship by freight.

**PARCEL POST.**—Strawberry plants can be sent by parcel post, postage prepaid, for  $\frac{1}{4}$  cent per plant additional to cover postage and extra packing. See page 56.

## SWEET MEATED NUT TREES

A Dish of Thomson English Walnuts

**Thomson English Walnut.** These walnut trees we offer for sale are known as the Thomson. They have been thoroughly acclimated and inured to cold climates by being grown here, subjected to our cold winters. A fairly safe rule in judging as to whether or not your climate and soil are suited to these trees is to plant only on land that will grow the apple or similar fruit successfully, yet where the climate is not too severe to grow and fruit the peach successfully.

The largest bearing orchard of which we have information is owned by Mr. Thomson, and is located a few miles outside of Rochester. It consists of 225 trees planted on 11 acres. The nuts from this orchard sell at prices so profitable that Mr. Thomson's son is planting a large orchard of this variety for himself.

The older and larger the English walnut trees get, the harder they are to transplant, so we do not advise planting trees that are too large. **Price: Strong, well developed trees, 3 to 4 ft., 75 cents each; 2 to 3 ft., 50 cents each. Smaller trees by mail 50 cents each.**

Have you heard that English walnuts can be grown as far north as Rochester, N. Y.? My neighbors have these nut trees, planted 30 years ago, bearing nuts every year. There are English walnut groves or orchards near Rochester, N. Y., that attract attention of the pomological world. They produce wagon loads of fine nuts, selling at a big profit.

Groveland, N. Y., people have been disposing of their yield to Mt. Morris merchants this fall at unusual prices, \$3 a bushel for large hickorynuts, \$1.50 for walnuts and \$1 for butternuts.

Green's Nursery Co.: I have over 200 of your trees. Have had some fine Elberta peaches off my three year old trees this season. Would not think of planting anything but Green's trees. My red raspberries I got from you last spring produced some fine berries. Geo. SCHUBERT, Aurora, Ind., February 3, 1917.

**Butternut.** A fine native tree, producing a large, longish nut, which is prized for its sweet, oily and nutritious kernel. The tree grows rapidly and yields large crops in a few years. You will remember the glad days of autumn in boyhood times when you gathered these thick meated nuts and stored them for winter use. The butternut has never been appreciated. It has been too common and too easily secured. Of late years interest has been revived in the old fashioned butternut, which is most nourishing and appetizing. It bears marvelous quantities of nuts of large size. **Price: 5 to 7 ft., 50 cents each, \$4.50 per 10; 4 to 5 ft., 40 cents each, \$3.50 per 10.**

**Black Walnut.** The well known black walnut produces heavy crops of large, oily nuts that are relished by all persons who are familiar with them. The tree grows quite fast and its dark, rich wood is exceedingly valuable. Great interest has been taken of late in the black walnut on account of its wood coming into fashion by furniture makers. It is used largely for gun stocks and it is difficult now to get enough black walnut timber. But in addition to the value of its wood the black walnut is an attractive nut, more highly flavored than any nut I can think of, and most nutritious on account of its oily flesh. We all recall the black walnuts growing on the homestead farm when we were boys. **Price: 6 to 8 ft., 70 cents each; 5 to 6 ft., 60 cents each; 4 to 5 ft., 50 cents each.**

**Pecans.** Everybody is familiar with the elongated shaped nuts this tree produces, which are of very high quality and of a distinct nutty flavor. **Price: Small trees, 50 cents each; \$4.50 per 10.**

**Japan Walnut.** (Siebold.) This is a very hardy variety, will stand 20 degrees below zero without injury, a rapid growing, handsome tree which bears young and abundantly. The shell is but a little thicker than that of the English walnut, the meat of which comes out whole and is of excellent quality. This variety begins to bear when two or three years old. **Price: 4 to 5 ft., 75 cents each; 3 to 4 ft., 50 cents each.**

**Hazelnut.** (Filbert.) Hazelnuts are very easy to grow, in fact can be grown far easier than potatoes or wheat. They are perfectly hardy and will struggle along in spite of neglect. They bear early and abundantly. The nuts should not be gathered until ripe, the condition indicated by the browning of the edges of the husks. Every city and country home should have some of these trees. **Price: Small trees, 25 cents each; \$2.00 per 10.**

### BARGAIN SALE

We offer trees of various sizes of the American Elm, Silver Maple, Ash Leaved Maple, Hardy Catalpa, Golden Willow, Carolina Poplar, Norway Maple and Norway Spruce. If you have use for 50, 100 or 1,000 of these trees, please write for special pen prices. See Ornamental Tree pages in this catalog for descriptions.

**American Sweet Chestnut.** By far the most popular variety of chestnut. Nuts of this variety are of large size, very sweet with nutty flavor. This chestnut is a grand timber and ornamental shade tree, making a most beautiful specimen for the lawn. The tree succeeds on any fairly well drained soil, also on stony land where little else will grow. No collection of nut trees is complete without one of this variety. **Price: 4 to 5 ft., 50 cents each, \$4.50 per 10; 3 to 4 ft., 45 cents each, \$4.00 per 10.**

PARCEL POST—For prices of trees by parcel post, see page 56.

# GARDEN ROOTS

**Palmetto Asparagus.** This is a large growing variety particularly delicious in quality. No home garden can be complete without it. Asparagus is one of the greatest garden delicacies, coming in at a season when there is no competitor. When once planted this will continue to produce abundantly for life. The plants late in the season are objects of great beauty, and are worth growing for their beauty. Palmetto Asparagus is valuable for its health-giving properties. It is also appetizing and is a rare delicacy for any table. **Price: Strong 2-year plants, 50 cents per 25, \$1.00 per 100, \$5.00 per 1,000.**

**Conover's Colossal Asparagus.** No vegetable is so attractive to the delicate appetite of the epicure as the first delicious cuttings of this early asparagus. No vegetable is more beneficial as an appetizer to persons of sedentary habits. It is difficult to account for its cultivation being neglected. In country gardens it is rarely to be found, although so healthful and nutritious; yet everyone should have an asparagus bed. This good old variety is known everywhere; is of large size, rapid in growth and of good quality. **Price: Strong 2-year plants, 50 cents per 25, \$1.00 per 100, \$5.00 per 1,000.**

**Giant Argenteuil Asparagus.** (New.) A large, tender and delicious variety. A rapid grower and desirable in every respect. **Price: Strong 2-year plants, 50 cents per 25, \$1.00 per 100, \$5.00 per 1,000.**

**Horse Radish.** Will stand a great deal of hardship and persist in soil year after year. Plant in deep, rich, cool soil. The yield will carry according to the soil and treatment. As high as ten tons have been secured from an acre. **Price: Strong sets, 25 cents per 10, \$1.00 per 100.**

**Sage.** (Holt's Mammoth.) The leaves of this plant are used extensively for flavoring dressing and sauces. **Price: Heavy transplanted roots, 25 cents each, \$2.25 per 10, \$10.00 per 100.**

**Linnaeus Rhubarb.** We have millions of well-rooted Rhubarb plants for sale. When spring opens, the human system needs an acid. Fruits have not yet supplied these acids, therefore rhubarb, or pieplant, is the main source. Those who eat pieplant pie and sauce freely are greatly benefited. Do you realize what excellent

**Palmetto Asparagus**

**On a Tour of Inspection—Mr. Green Examining One of Our Fields of Rhubarb (Pieplant)**

sauce can be made of rhubarb? Set 15 to 18 inches apart, in the row. For ornament alone it pays to plant it. This is the best variety. **Price: Strong roots, 10 cents each, 75 cents per 10, \$5.00 per 100, \$40.00 per 1,000.**

**PARCEL POST**—Asparagus Plants and Sage can be sent by parcel post, postage prepaid, for 5 cents per 10 or 25c per 100 extra.

Rhubarb roots can be sent by parcel post, postage prepaid, for 3 cents extra per root. Horse Radish for 5 cents per ten extra.

Rochester, N. Y., has long had the reputation for producing the hardest vines and trees. We have plenty of moisture but not the heat that produces a succulent or second growth liable to be winter killed; the growth here made in our trees is slow and enduring and the wood is well ripened preparatory to the hardships of winter.

Photograph shows in foreground Yucca Flowering Plant and Norway Spruce, and in the background a clump of Elm, Maple and Catalpa, representing a scene in Mount Olivet Cemetery of Detroit, Michigan, photo from Packard Motor Co.

Frau Karl Druschki Roses

## HARDY ROSE BUSHES

### TWO YEARS OLD

**Frau Karl Druschki.** (Snow Queen.) The finest white rose. It is marvelous in its beauty in half opened bud and in the pure white of the full opened bloom. Price: Strong 2-year old, No. 1 bushes, 35 cents each.

**Paul Neyron.** Flower of immense size, one of the largest grown and one of the finest; color deep shining rose, very fresh and pretty. Price: Strong 2-year old, No. 1 bushes, 35 cents each.

"We love our flowers at noonday. Courageously they stand beneath the steady sun inspiring us to braver battle through the hours of afternoon."  
"We love our flowers at twilight and in the deeper night time, our misty garden walks fragrant with Roses."

**Rosa Rugosa.** (Red.) (Japanese Rose.) Seed pods (or Rose apples) borne abundantly, highly attractive. Price: Strong bushes, 40 cents each.

**Madam Plantier.** Pure white, produced in great abundance early in the season. Price: Strong 2-year old, No. 1 bushes, 35 cents each.

#### Green's New Rose Collection No. 4

8 Splendid Two Year Rose Bushes for \$2.20

1 Crimson Rambler	1 Frau Karl Druschki
1 General Jacqueminot	1 Dorothy Perkins
2 Live Forever	1 Magna Charta

1 C. A. Green's Selection

Special Price \$2.20 (Sold Elsewhere \$2.90)

This Rose Collection cannot be sent by parcel post.

**Mrs. John Laing.** (Pink.) Price: Strong bushes, 50 cents each.

Your first impulse on seeing a lovely rose is to smell it, and no matter what perfection of leaf and color it shows you are disappointed when it only exhales that slight fragrance which we call "tea." There is no flower which grows which has had so much written about it as the rose. It is the flower of romance and of love, and has been since the first rose bloomed, "high in paradise, by the Four Rivers."

**Live-Forever Rose.** A brilliant, hardy Rose. If you have tried growing roses and failed, try once more, for we have discovered a rose which lives long and is proof against insects and diseases. Price: Strong 2-year, No. 1 bushes, 20 cents each; \$1.75 per 10; \$15.00 per 100.

**Magna Charta.** A general favorite, prized on account of its strong upright growth and bright, healthy foliage, as well as for its magnificent bloom. The color is beautiful pink, suffused with carmine. Price: Strong 2-year old, No. 1 bushes, 35 cents each.

Magna Charta Rose

An Arbor of Climbing and Rambler Roses

**Crimson Rambler.** A climbing rose of unusual attractions. Very hardy. Vigorous in growth, having grown 8 to 10 feet in a season. Produces a profusion of blossoms, having been known to produce 300 blossoms on one shoot. The Crimson Rambler is especially adapted for covering trellises. Its cluster form, its brilliancy, the abundance of its bloom, and the great length of time the flowers remain on the plant without falling or losing their brilliancy, are qualities which make this rose an assured favorite. **Price:** Strong 2-year old, No. 1 bushes, 35 cents each.

**Yellow Rambler.** Flowers of medium size, in immense clusters, very sweet-scented; a clear decided yellow. **Price:** Strong 2-year old, No. 1 bushes, 35 cents each.

**White Rambler.** Resembles Crimson Rambler in foliage and habit; flowers pure white. **Price:** Strong 2-year old, No. 1 bushes, 35 cents each.

**Crimson Baby Rambler.** Can be planted outdoors or put in pots indoors. A dwarf (bush) form of Crimson Rambler, and, furthermore, everblooming. Has the same bright crimson color as the climbing Crimson Rambler, and blooms in clusters of 20 to 40 flowers at one time on plants of fair size. **Price:** Strong 2-year old, No. 1 bushes, 40 cents each.

**Veilchenblau.** (Blue Rambler.) This is a new rambler rose, producing flowers of a pale violet blue color. It is very hardy and distinctively a novelty. **Price:** Strong 2-year old, No. 1 bushes, 35 cents each.

*"You may break, you may shatter the vase as you will,  
But the scent of the roses will hang round it still."*

**Moss Roses.** Old favorites. Especially pretty when in bud. We offer these in white, pink and red. **Price:** Strong 2-year old, No. 1 bushes, 35 cents each.

**Dorothy Perkins.** (Climber.) A most valuable Pink Rambler Rose. Flowers are very double, of large size, usually two inches across and borne in loose clusters. The petals are very prettily rolled back and crinkled; the buds are remarkably handsome, being pointed in shape and of just right size for the buttonhole. **Price:** Strong 2-year old, No. 1 bushes, 35 cents each.

**General Jacqueminot.** Deep, brilliant shaded crimson, with large petals, globular with high center. **Price:** Strong 2-year old, No. 1 bushes, 35 cents each.

#### THE ROSE

The season is here for roses,  
And how charming seems the air!  
Every bush is hanging loaded,  
With the colors gay and fair.  
There's the white, pink, red and yellow,  
And they all are looking sweet;  
Some are double, some are single,  
Like the people whom we meet.  
Oh, how often have I wondered  
Why the thorns are on the stems  
Of a bush that is so lovely.  
With its sweet and pretty gems!  
But there is in it a lesson  
For the many who do mourn:  
If they will accept the sweetness  
They must also take a thorn.

Albert E. Vassar.

Crimson Baby Rambler Rose Bush

## ORNAMENTAL TREES

**American Elm.** The American elm is not only one of the most beautiful of our ornamental trees and one most easily transplanted and sure to live if properly treated, but also one of the longest lived, one that makes the least rubbish upon the lawn, and one that thrives in almost any soil. It will succeed in the swamp and on the hillside, or on the slopes of the mountain. Its timber is prized more highly each year, being hard and tough and taking a good polish. The shape of the elm is more often upright, but in many instances the tops are flat. Sometimes the branches extend nearly to the ground, while in other instances there is a tall trunk under the top, but however trained—and trees can be trained to grow in any method we may desire—it is an object of beauty. There are more elm trees planted along our streets and highways than any other one variety. This on account of its dense green foliage. They make very desirable lawn trees. One of the most characteristic and picturesque of our American trees. **Price: 6 to 8 ft., 33 cents each; 8 to 10 ft., 50 cents each; 10 to 12 ft., 75 cents each**

**Birch (European).** White barked 3 to 4 feet high, 40 cents each. This is the size to plant. Larger size does not transplant well

If you have already received a copy of this catalog, kindly hand this copy to a friend or neighbor.

**Russian Mulberry.** Desirable for ornament and shade. A favorite on account of its beautiful cut foliage and fruit. A worthy tree for ornament. The berries have some medicinal properties and are readily devoured by poultry and cattle. **Price: 4 to 5 ft. trees, 30 cents each, \$2.50 per 10; 5 to 6 ft. trees, 40 cents each, \$3.50 per 10.**

Russian Mulberries

American Elm, Monarch of Trees. This Tree Made One Farm Famous

**Purple Leaved Plum.** (*Prunus Pissardi*) **Price: 50 cents each.**

**Double Flowering Plum.** (*Prunus Triloba*) **Price: 50 cents each.**

**Cut-Leaved Weeping Birch.** **Price: 6 to 8 ft., \$1.25 each.**

### Green's Shade Tree Collection No. 8

#### 10 Extra Large Shade Trees for \$3.50

- 1 Norway Maple, 8 to 10 ft. high
- 1 Silver Maple, 8 to 10 ft. high
- 1 Ash Leaf Maple, 8 to 10 ft. high
- 1 American Elm, 6 to 8 ft. high
- 2 Hardy Catalpa, 6 to 8 ft. high
- 2 Golden Willow, 4 to 5 ft. high
- 1 Carolina Poplar, 6 to 8 ft. high
- 1 Lombardy Poplar, 5 to 6 ft. high

Special Price \$3.50

(Sold Elsewhere \$5.00)

**Hardy Catalpa.** (*Speciosa*). One of the most showy flowering trees and is noted for its rapid and vigorous growth. Its foliage is heart-shaped and downy. Its flowers are compound panicles, almost pure white, but tinged with violet and dotted with purple and yellow. It is highly ornamental and useful. Its timber is highly prized for fence posts, railroad ties, etc., possessing marvellous durability. The catalpa tree can be made compact in its growth of head by shearing back the ends of the branches each year, a process which we advise with many kinds of ornamental trees and particularly with ornamental shrubs.

Prof. Hussman, of the Missouri State Horticultural Society, described it as follows: "It looks like a production of the tropical zone, yet it seems to be entirely hardy, with its immense leaves, velvety brown when they first appear, and changing into dark green; followed by immense panicles of flowers, containing sometimes between three and four hundred buds and blossoms, contrasting finely with its dark massive foliage."

	Price	Each	10	100
5- 6 feet		\$0 25	\$2 00	\$17 00
6- 8 feet		35	3 00	22 00
8-10 feet		50	4 50	30 00

The Beautiful Carolina Poplar

### American White Oak and English Oak.

Price: 8 to 10 ft., \$1.00 each.

## BEAUTIFY THE HOME GROUNDS SEE HOW IT WORKS

Have you seen a dwelling, the grounds of which are barren of trees and vines? Have you seen a farm upon which there is no orchard, or fruit bearing trees? Have you seen these homes and farms after they have been beautified and made fruitful and profitable by the introduction of ornamental trees and shrubs? Bring these two pictures to your mind,

one representing a house about which no trees or shrubs have been planted, the other showing the same place after it has been beautified and made fruitful and profitable by the introduction of ornamental trees and shrubs. The planting of one tree would relieve the barren appearance. The planting of a few trees in the rear, and a few shrubs and trees in the front yard, or at one side, would make a transformation. The planting of a few trees to beautify a barren home and supply fruit for the table. Duty to your family urges you to plant.

Hardy Catalpa

**Paul's Double Scarlet.** Flowering Thorn Apple. Price: 75 cents each.

**Double White.** Flowering Thorn Apple. Price: 75 cents each.

**Carolina Poplar.** It is one of the most rapid growers among shade trees, frequently growing 8 feet during one season, and thus making fine avenues in a few years. It is very desirable at the roadside, in parks, along rivers and streams for the protection of the banks. It has advantages over other shade trees because it will grow in any kind of soil, swampy or muck, light or heavy. It is easily started and gives shade in a short time. Very useful for planting as a screen to shut out unattractive buildings.

	Price	Each	10	100
5- 6 feet		\$0 20	\$1 75	\$10 00
6- 8 feet		25	2 25	13 00
8-10 feet		30	2 75	18 00

**Catalpa Bungei.** (Umbrella Catalpa.) Price: 6 to 8 ft., \$1.50 each.

**Bechtel's Double Flowering Crab.** Price: 75 cts. each.

**Golden Willow.** This willow can be grown either as a tree or, by cutting back annually, can be grown as a shrub. It is especially desirable on account of its golden colored bark. It is conspicuous in all seasons, but particularly so in winter.

	Price	Each	10
3-4 feet .....		\$0.10	\$9.90
4-5 feet .....		.20	1.75

**Lombardy Poplar.** This is an old favorite. Well known and remarkable for its erect, rapid growth and tall, spiral form. Indispensable in landscape gardening to break the ordinary and monotonous outline of most other trees.

	Price	Each	10	100
4-5 feet .....		\$0.15	\$1.25	\$ 9.00
5-6 feet .....		.20	1.75	12.00
6-8 feet .....		.30	2.50	18.00

Golden Willow, Bark like Gold

Lombardy Poplar

**Photograph of a Bed composed of Ornamental Grass, Eulalia (Gracilima Univittata).**—This is sometimes known as Ostrich Plume, since when in blossom during the latter part of the summer, the blossoms resemble ostrich plumes. These plumes, cut and placed in vases in the house, without water, will keep for months or years and are a thing of beauty. The bed shown in the photograph is at the city home of our C. A. Green. At the left in the rear is a Poplar tree, which if well located is one of the most striking trees known. Further back than the bed, to the right, is an American Elm, and to the right of that the Austrian Pine. **Ostrich Plume: Price 10 cents each.**

### Planting of Shrubs and Trees

Most people who are planting shrubs or trees have good soil, thus it is no hardship for them to plant successfully. If you are planting a tree or a shrub in a grass plot see that the sod is removed for a space of two to three feet wide, keeping the sod in a pile by itself at one side. Then excavate the hole to the depth of 12 to 15 inches. Without disturbing the subsoil place the tree in position and cover the roots with the loose soil taken from the hole, packing the earth firmly as you proceed in covering the roots. Now the tree is planted, but if you will place the sods that you have just disturbed over the surface of the ground around the tree with grass side down and roots up, these sods will make an excellent mulch and will retain the moisture around this newly transplanted tree better than most any other substance, although strawy litter or manure will answer a similar purpose. These sods should be disturbed occasionally through the summer to see that they do not again begin growth.

Norway Maple

Silver Maple

Ash Leaved Maple

**Norway Maple.** If you see in your walks or drives a maple tree with roundish and compact top, having an unusually prosperous and healthy appearance, with an abundance of broad and bright green leaves, you may suspect that you are looking upon a Norway maple, which is quite distinct from the sugar maple which is more upright in growth. The bark of the Norway maple is smoother and the tree is inclined to have a straighter growth of trunk. It is one of the hardiest ornamental shade trees, and one of the most beautiful. A noble variety both in growth and form. Very popular for shade and ornament and with its broad, showy leaves has many admirers.

The Norway maple is the most vigorous grower of all the maples. There is no tree more extensively used for the ornamentation of public highways in cities and villages than the Norway maple. It is one of the hardiest of trees, succeeding anywhere. It is easily transplanted.

Do not think that you can save time by planting overlarge trees of the Norway maple or of other ornamental trees. My experience is that trees of moderate size are most desirable for planting upon the margin of streets or as ornaments of your home grounds. Trees of moderate size can be shipped and transplanted with little risk of loss. They should be planted a little deeper than you would plant an apple or pear tree. The branches should be cut back about half their length the same as we advise for fruit trees.

	Price	Each	10
6- 8 feet.....	\$0 60		\$5 50
8-10 feet.....		80	7 50
10-12 feet.....		1 50	

Write for price on 100.

**Sugar or Rock Maple.** Price: 4 to 6 ft., 40 cents each; 6 to 8 ft., 60 cents each.

**Wier's Cut-Leaved Maple.** Price: 75 cents each.

**Schwedlerii.** (Red Leaved Maple.) Price: 6 to 8 ft., \$1.00 each.

**American Linden or Basswood.** Price: 50 cents each.

**Mountain Ash.** Price: 6 to 8 ft., 65 cents each.

**Ash Leaved Maple (or Box Elder).** A fine rapid-growing variety, with striking blue colored bark, handsome, light green foliage and spreading head; very hardy; desirable for street planting and succeeds in many sections where other varieties do not thrive. Easily transplanted.

	Price	Each	10
6- 8 feet.....		\$0 40	\$3 50
8-10 feet.....		.75	6 00
10-12 feet.....		1 00	8 50

**Silver Maple.** (Scarlet Maple.) This is a very beautiful ornamental tree and is in great demand for street, lawn and park planting. It is one of the easiest trees to transplant and a remarkably fast grower, thrives equally well in well drained or low swampy locations. The foliage is of an attractive, silvery color and the tree is well shaped.

	Price	Each	10
6- 8 feet.....		\$0 35	\$3 00
8-10 feet.....		50	4 50
10-12 feet.....		.75	7 00

Write for price on 100.

**Red Flowering Horse Chestnut.** A very beautiful tree with deep green foliage and showy red flowers; is not as rapid a grower as the White Horse Chestnut. Price: 8 to 10 ft. stems, 2-year grafted heads, \$2.00 each.

**White Flowering Horse Chestnut.** Price: 50 cents each.

PRICES ARE FREE ON BOARD CARS AT ROCHESTER, N. Y.

PARCEL POST—Strong 1-year White Flowering Horse Chestnut trees can be sent by parcel post, put up prepaid, for 15 cents each. See page 56.

# EVERGREENS AND HEDGES

Norway Spruce in group, most beautiful. See prices below

**Norway Spruce.** This is the most desirable evergreen tree for all purposes and most popular. It is suitable for planting as an ornamental tree in groups around a large estate or park, as a windbreak to protect an orchard, farmhouse or other buildings, or as a hedge fence to divide fields. The Norway spruce comes from northern Europe where it attains a greater height than other forest trees, sometimes growing as high as 125 feet. But by shearing off the ends of the branches each season it can be dwarfed to any size that you may desire. It bears transplanting better than most evergreens and has greater endurance and ability to withstand severe climates. I do not favor transplanting large trees of Norway spruce or any other evergreen. Bear in mind that the smaller the evergreen tree the safer it is to transplant.

If any tree can be called "universal" the Norway spruce comes nearest to the requirements. It is extremely hardy and will grow on all kinds of soil and under all conditions. This tree will grow in crevices of rocks and on hillsides where it would be impossible for other trees to get necessary nourishment. This is the variety of evergreen usually sold for Christmas trees, and there is good profit in growing Norway spruce for this purpose, as they can be grown on waste land. When planted on the lawn or about the house as a single specimen Norway spruce is an elegant tree of lofty growth in pyramidal form. The branches assume a graceful, drooping habit, its lower branches sweeping the ground, when the tree attains 15 to 20 ft. in height. I know of no more beautiful sight in nature than a Norway spruce tree with its branches bent down with a burden of snow, as shown in the illustration. While the Norway spruce is attractive and conspicuous even as a small tree, it increases in beauty with every year of its life. It is during the winter months that the spruce is conspicuous upon the lawn.

It can be planted when small as a border for large growing beds, or it can be planted at intervals along the borders of the flowering beds for winter ornament. When the snow covers the earth like a blanket the evergreen foliage of the Norway spruce brightens up the grounds and makes us forget

the dreariness of winter. Were its value known as it merits, there would not be enough in stock in all the nurseries in the United States to supply the demand. For hedges and windbreaks there is nothing superior to the Norway spruce. We have a large supply of beautiful trees of various sizes which we offer at the following bargain price:

	Each	10	100
1½ to 2 feet.....	\$0.20	\$1.50	\$10.00
2 to 3 feet.....	.25	2.00	18.00
3 to 4 feet.....	.35	3.00	25.00

### SPECIAL PRICE on 300 to 1,000 lots.

These low prices are made for Spring 1918 because we have an unusual number ready for handling. All these are well shaped, transplanted specimens, ready for immediate effect.

Norway spruce will be balled with earth upon request, 1½ to 2 ft. 8 cents each, 2 to 3 ft. 10 cents each, 3 to 4 ft. 12 cents each extra per tree.

## Quality First

Quality first will apply to almost everything we buy. Particularly should quality first be considered in buying plants vines and trees. How important that the tree should be well grown and that no mistakes should be made in budding or grafting or in labeling or in packing for shipment. What a vast difference there is between the trees of different nurserymen, some looking rough and scabby with stunted growth, others looking bright, fresh and vigorous, the product of a healthy growth. How important that the digging should be done with care, that the roots should not be mutilated. Quality first should be the slogan of nurserymen and tree-planters.

Hedge of California Privet, not excelled in beauty

**California Privet.** The best of all hardy hedge plants. The city of Rochester, N. Y., is one of the most beautiful in the world. On almost every lot California Privet hedges are planted to divide one lot from another. This Privet hedge is also planted in front of most houses adjacent to the street. The Privet hedge is easily kept at any height desired. This hedge holds its foliage nearly all winter. It is almost an evergreen.

California privet is used in place of wire and board fences, as it not only makes a more desirable and beautiful fence, but is considerably cheaper per foot. One of the big advantages of planting this bush as a hedge is that it can be trimmed at any time of the year and can be shaped to any shape desired. Where broad hedges are desired, two rows of bushes are usually set, these rows being planted one foot apart and the bushes being set one foot apart in each row. The bushes are not set opposite each other in the hedge, but are alternate so that the bushes come six inches apart in the hedge. Where a hedge of ordinary width is desired, the bushes are set ten inches apart in a single row. In addition to planting for hedging purposes the California privet makes a very desirable shrub when set as a single specimen. **Price of California privet, heavy, two-year, well branched, 18 to 24 inches, 10 cents each, 75 cents per 10, \$3.50 per 100, \$30.00 per 1,000; 2 to 3 ft., 15 cents each, \$1.50 per 10, \$4.50 per 100, \$40.00 per 1,000.**

**PARCEL POST**—California Privet, strong, two-year, bushy plants, 15 to 18 inches high, can be sent by parcel post, postage prepaid, for 60 cents per 10, \$3.75 per 100. Dwarf Barberry, nice, strong bushes, can be sent by parcel post, postage prepaid, for 20 cents each, \$1.50 per 10.

**LEAN YEARS.** Do you know that the years 1916 and 17 were unprofitable years for nurserymen? This has caused many nurserymen to drop out of the propagation of plants, trees and vines and to go out of the nursery business. There is only one result that can be looked for in such an emergency and that is that the prices of nursery products must be higher in the future.

### Other Ornamental Hedges

In addition to the hedging plants and shrubs described on these pages, spiraeas, altheas, hydrangeas and Japan quince make very desirable ornamental hedges and should be planted for this purpose two feet apart. For description of these shrubs see later pages of this catalog.

**Dwarf Barberry.** (B. Thunbergii.) Very attractive, neat and dense in growth yet graceful because of its drooping branches. It produces yellow flowers in the summer which are followed by scarlet fruit, borne in dense profusion on the long stems and clinging throughout most of the winter. The leaves color to scarlet and gold. This is a very attractive shrub for planting as single specimens on or about a lawn, or for planting in the corners nearby the house or porch or along the base of the wall to take away the bleak barren effect of the wall. Dwarf Barberry is also used extensively for planting on borders in connection with other shrubs, for owing to its dwarfish habit, if planted in the front of other shrubs, it takes away any ragged effect, making only a mass of green visible to the eye. It is also used extensively for planting in the corners where sidewalks meet. For a hedge not over 2 or 3 feet high this makes a very desirable shrub. We recommend it highly. **Price: Strong bushes, 18 to 24 inches, 30 cents each; \$2.50 per 10; \$20.00 per 100.**

Dwarf Barberry as a Hedge Plant

**Live-Forever Rose.** A hedge row of Live-Forever Roses is a beautiful sight in summer. Imagine a row 500 feet in length, containing 500 bushes, set one foot apart three years ago and each bush showing an average of 1,000 buds and blossoms, and you can get some idea of one of our attractive hedge rows last summer. The bush is very hardy, standing our severe winters without any protection. **Price of Live-Forever Rose for hedging, 2-year No. 1, 20 cents each; \$1.75 per 10; \$15.00 per 100.**

**The American Arbor Vitae** is a favorite evergreen. Its

growth is not so rampant as to be objectionable, and yet it soon assumes a condition of great beauty, being attractive from the moment it is planted. The foliage is feathery and spray-like, becoming more dense after each pruning with shears. This evergreen seems to adapt itself to all locations but does especially well where the soil is moist. We offer trees 14 to 20 inches for hedges or borders of beds. **Price, 20 cents each, \$1.50 per 10, \$10.00 per 100. Will ball for 6 cents each additional.**

**Koster's Blue Spruce.** This is by far the most beautiful variety of spruce and is much more beautiful in color than the variety commonly known as Colorado Blue Spruce. The foliage is of intense silvery blue, and this beautiful color combined with its fine compact habit of growth makes a very desirable evergreen for home planting. This is a very rare variety of evergreen and in great demand. This is a grafted variety, imported from Europe. It is very hardy. **Price: Strong, well developed trees, 18 to 24 inches, \$2.50 each.**

You will get more pleasure from the trees, plants and vines knowing that they have come to you from the old and reliable Green's Nursery Company of Rochester, N. Y.

Beauty of Norway Spruce in Winter

Hedge of Norway Spruce, small trees were planted 18 inches apart. Do not plant large evergreens

**Weigela**  
Price 35 cents each

**Blossom of Butterfly Bush (New)**  
Price 40 cents

**Golden Leaved Elder**  
Price 25 cents each

## ORNAMENTAL SHRUBS

### The Weigela.

The Weigela is one of the most charming shrubs in cultivation; it cannot be too highly recommended; the flowers are large, trumpet shaped and are borne in great profusion. We offer them in colors, red, pink and white. In late May and June the branches are bent beneath the abundance of flowers which cover the entire branches. Adapted to all soils. Price: Strong bushes, 35 cents each; \$3.00 per 10.

### Butterfly Bush.

This name was given it because it seems to attract butterflies in large numbers. This shrub, planted either in the Spring or Fall, will mature to full size the first Summer, making a handsome bush of about four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is often ten inches long. A single plant will throw out as many as fifty flower spikes the first season, which increase greatly in number during succeeding years. It blossoms from early summer till frost. Price: Strong bushes, 40 cents each; \$3.50 per 10.

### Golden Leaved Elder.

The best of all the colored shrubs. A plant of this bush in a bed, or a border, or on the lawn, is a conspicuous feature, the foliage being as yellow as gold. A strong growing shrub with light green foliage, a beautiful golden bark. The white flowers in June and July are followed by black fruit in August and September. Price: Strong bushes, 25 cents each; \$2.00 per 10.

### Dwarf Barberry.

(B. Thunbergii) This is the very best hedge shrub for a low hedge 2 to 3 ft. in height. The foliage is brilliant green in summer, taking on the most glowing colors from early autumn until December, and after the leaves fall the branches are covered with crimson berries which hang until March or April. It is also a desirable shrub to plant against the foundation of a house or in front of other taller growing shrubs to take away the bare effect of the stems of the tall shrubs at the bottom. Price, strong bushes, 18 to 24 inches, 30 cents each, \$2.50 per 10, \$29.99 per 100.

Green's Nursery Company's capital is over \$100,000. We occupy five farms. Financial reference: Trustee, National Bank, Rochester, N. Y.

Green's Nursery Co. Several years ago I ordered some plants from you for my yard in the city. Last fall I ordered trees from another firm nearer home and have been disappointed. The trees had such fine straight trunks, good habit and beautiful foliage different from the ones I ordered from you. I have ordered more. DR. F. L. BARTLET, Washington, D. C.

"Maud Muller on a summer's day raked the meadow sweet with hay." Later she walked in the fruit garden provided by a generous father. Here she plucked peaches fair as her cheeks, apples like crown jewels, purple plums, ruby red cherries, raspberries and grapes of all the hues of the rainbow. Long live Maud Muller, but her father die!

"We believe in flowers. We love them in the mornings when the early sunshine wakes them with a kiss and they, in turn, laugh just to be alive."

**Purple Fringe**  
Price 40 cents each

**Althea**  
Price 35 cents each

**Purple Barberry**  
Price 30 cents each

**Purple Fringe or Smoke Tree.** Unlike any other flowering shrubs, blossoms resemble a cloud of smoke. Much admired and conspicuous in flower, and also pretty on account of its foliage in autumn. **Price: Strong bushes, 40 cents each; \$3.50 per 10.**

**Golden Leaved Syringa.** (Mock Orange.) This is a very pretty, medium size plant. With golden-yellow foliage. It keeps its color the entire season; valuable for striking contrasts with purple-leaved shrubs. **Price: Strong bushes, 40 cents each; \$3.50 per 10.**

**Purple Leaved Barberry.** A beautiful shrub with showy, small yellow flowers, and beautiful red berries in pen-  
violet purple foliage; dulous clusters. **Price: Strong bushes, 30 cents each; \$2.50 per 10.**

**Forsythia Viridissima.** (Golden Bell.) A fine, hardy shrub. It comes into bloom early, and flowers are of a bright orange-yellow. **Price: Strong bushes, 35 cents each; \$3.00 per 10.**

**Yucca  
Filamentosa.**

I know of no flowering plant more showy. It is a gorgeous grower and endures the most severe winters without protection. It blossoms year after year, for a lifetime, and its flowers look like white lily blossoms. **Price: Strong plants, 25 cents each; \$2.00 per 10.**

**Althea.** (Rose of Sharon.) One of the most showy flowering shrubs; strong, erect growing, with large bell-shaped, double flowers of striking color, borne abundantly in August and September, when most other shrubs are out of bloom. We have pink, white, red and purple. They are very hardy, easily cultivated, and will bloom until their growth is cut short by frost. **Price: Strong bushes, 35 cents each; \$2.50 per 10.**

A nation can thrive only through the thrift of its people. The thrifty man plants trees.

**Common Syringa.** (Mock Orange.) Flowers white, deliciously perfumed. Derives its name owing to flowers resembling orange blossoms; a delightful substitute for that noble flower. **Price: Strong bushes, 30 cents each; \$2.50 per 10.**

**A Bed of Yucca. Foliage like Century Plant. Price 25 cents each**

Lilac

Paonies

Phlox (Everflowering Perennial)

**Paonies.** This beautiful flower rivals the rose in beauty. They require no protection, come up every season, and can be left in the ground indefinitely.

With all deference to the claims for favorite garden plants and hardy perennials, there are few other flowers to compete in magnificence of bloom, size, color, or fragrance with the paenony. If the rose is the queen of flowers, the paenony should be called the king.

One feature in favor of the paenony is its exemption from insects or disease. Though it is occasionally infested with aphids, a liberal syringing with tobacco or soapy solutions will get rid of them. The presence of aphids is indicated by black ants running over the stem and foliage. These ants feed on the honey dew exuded by the aphids.

The proper position for paenony plants is in borders among other perennials that flower earlier or later. The strong rich foliage of the paenony makes effective contrasts. We prefer planting in borders rather than in round beds in lawns. Do not forget that paenonies do well in shady places as well as in the more open spaces.

**C. A. Green's Collection of Mixed Colors.** Our C. A. Green has a choice collection of paenonies, a great mixture of colors, all beautiful beyond our ability to express. He has searched far and wide for rare varieties and those possessing the greatest beauty of bloom and vigor of growth. In it are the various colors from white to different shades of pink, purple, crimson and salmon color. We have been propagating from the plants growing on Mr. Green's private grounds and have a good supply of these rare varieties. The different colored varieties are all mixed together, and as it is impossible to tell the color of a variety by the roots, please do not specify color when ordering from this collection. If you want special colors we recommend to you Green's pink, white and red, varieties described on this page. Price of C. A. Green's rare collection of mixed colors, strong plants, 25 cents each; \$2.00 per 10.

**Green's Pink Paenonies.** In addition to our mixed colors we have a large collection of beautiful pink paenonies. These paenonies are not surpassed in size or brilliancy of color. Price of Green's pink paenonies, 30 cents each; \$2.50 per 10.

**Green's White Paenonies.** These white paenonies are unsurpassed for beauty, size of blossom and vigor. Price of Green's white paenonies, 30 cents each; \$2.50 per 10.

**Green's Red Paenonies.** A beautiful shade of red paenony, very desirable for planting with the white varieties, and indispensable in any collection. Price of Green's red paenonies, 30 cents each; \$2.50 per 10.

**Green's Two-Color Paenonies.** Price: 30 cents each; \$2.50 per 10.

A Clump of Green's White Paenonies

**Spiraea Van Houttei**  
Price 30 cents each

**Mock Orange (Syringa)**  
Price 30 cents each

**Deutzia Crenata Rosea**  
Price 40 cents each

**Spiraea Van Houttei.** The grandest of all Spiraeas. It is a beautiful ornament for the lawn at any season, but when in flower it is a complete fountain of white bloom, the foliage hardly showing. The best of the spiraeas. It is of a drooping habit, reaching a height of 6 to 8 feet when matured, producing a profusion of white flowers in June. Price: Strong bushes, 30 cents each; \$2.50 per 10.

**Spiraea Billardi.** A free bloomer. Produces rose colored flowers nearly all summer long. Price: Strong bushes, 35 cents each; \$3.00 per 10.

**Spiraea Prunifolia.** (Bridal Wreath.) Blooms in May with pure white double flowers. Makes showy specimen plants for lawn. Price: Strong bushes, 35 cents each.

**Spiraea Anthony Waterer.** Makes a dwarf bush 15 to 18 inches high, covered from spring till late in the fall with large heads of crimson flowers. Perfectly hardy. Price: Strong bushes, 35 cents each.

**Spiraea Callosa Rosea.** Has large panicles of deep rosy blossoms; grows freely; blooms nearly all summer. Price: Strong bushes, 35 cents each; \$3.00 per 10.

**Blue Spiraea.** (New.) Price: Strong bushes, 40 cents each.

**White Fringe.** A small native tree or shrub, of roundish form, with large, glossy leaves and drooping racemes of pure white flowers, having narrow fringe-like petals; blossoms in May or June. A superb lawn tree. Price: \$1.00 each.

**Tree Cranberry.** Hardy as a rock and most desirable, combining the ornamental with the useful. The blossoms are white, single and very showy and its beautiful fruit clings to the branches in winter. Price: Strong bushes, 30 cents each; \$2.50 per 10.

**Deutzia Crenata Rosea.** (Double Flowered Deutzia.) This is a variety that has very full double flowers which are white tinged with rose. The flowers are produced in great profusion in racemes from 4 to 5 inches long. Price: Strong bushes, 30 cents each; \$2.50 per 10.

**Deutzia Candida.** A valuable variety. It is of vigorous habit, an erect grower, becoming in time a large-sized shrub. Flowers pure white, produced in great profusion during June, and the plants continue to bloom through the summer. Price: Strong bushes, 40 cents each; \$3.00 per 10.

**Japan Quince.** (Cydonia Japonica.) The prevailing and most desirable color, we think, is the deep crimson. Blossoms in early spring, and produces considerable fruit, which increases its value as an ornamental. Price: Strong bushes, 35 cents each; \$3.00 per 10.

**Deutzia Candida.** Price 40 cents each

A Hedge of Hardy Hydrangeas. Price 40 cents each

**Lilacs.** Every lawn or garden ought to have at least a few of these beautiful shrubs. They flower in May and probably are the best known of all shrubs.

**Lilac—Old Homestead.** There are no flowering plants more highly prized than this beautiful pink lilac. The Old Homestead lilac is not claimed to be a new variety. It is a choice variety found in an old garden at Green's Fruit Farm. Price: **Strong bushes, 25 cents each; \$2.00 per 10.**

**Lilac—Vulgaris.** (Common Purple Lilac.) The well known, old-fashioned variety, one of the best. A good grower; flowers and young wood fragrant; purple. Price: **Strong bushes, 25 cents each; \$1.75 per 10.**

**Lilac—Alba.** (Common White Lilac.) A very desirable contrast to the purple. Those who have one should have the other. Price: **Strong bushes, 35 cents each; \$2.50 per 10.**

**Lilac—Villosa.** A most pleasing variety of lilac, differing in foliage and blossom from all other lilacs—a great favorite with us. Flowers abundant, large clusters, pink and latest to bloom of all lilacs. Price: **Strong bushes, 45 cents each; \$4.00 per 10.**

### **Lilacs—New French**

**Varieties.** We have a large assortment of both single and double flowering varieties in the following colors: violet, purple, white, red, blue, deep rose and blue carmine. When ordering state whether double or single varieties are wanted and what color. Owing to the fact that our supply of these new French varieties is very limited, we reserve the right, in case we are out of the color ordered, to substitute a color or shade that is similar to the one ordered. Price: **Both single and double varieties, strong bushes, 50 cents each; \$4.00 per 10.**

### **Hardy Hydrangea.**

(*Paniculata Grandiflora*.)—We urge our friends to plant the Hydrangea. It is hardy, enduring the severest winters outdoors without protection. It is easily transplanted, not one in a thousand dying; it never fails to blossom the first year planted; no matter how small the plant, it immediately buds out in great profusion of flowers, many of them as large as the head of a full grown child. When the specimens first open, they are greenish white, later they turn to a pure white, and still later to a delicate pink. Price: **strong bushes, 40 cents each; \$3.50 per 10. Tree form, 3 to 4 ft., 75 cents each.**

**Hydrangea Arborescens.** Blooms very large size, resembling snowball, but larger. Perfectly hardy. Blossoms from early June through August. Price: **Strong bushes, 40 cents each; \$3.50 per 10.**

**OUR SATISFIED CUSTOMERS ARE OUR BEST ADVERTISEMENT. ASK THOSE WHO HAVE PLANTED OUR TREES.**

Our catalog is our only and silent salesman.

**Rhododendron.** Price: **Strong bushes, \$2.25 each.**

**Snowball.** (*Viburnum*.) A well known favorite shrub, with globular clusters of white flowers the latter part of May. This good old early and sure flowering shrub is planted perhaps more extensively than any other. It is found in every collection in the gardens of the rich as well as the poor. Price: **Strong bushes, 30 cents each; \$2.50 per 10.**

**ORDER EARLY**

A Branch of a Snowball Bush. Snowball Bush. Price 30 cents each

# HARDY PERENNIAL PLANTS and BULBS

A Plant of Golden Glow. Price 10 cents each

**Golden Glow.** This is a beautiful yellow blooming perennial plant, and like phlox, it stands out of doors all winter. The foliage, which dies back every fall, springs up vigorously in the spring and grows to the height of 5 or 6 feet. If you do not wish the plants to grow so high, nip them off when they are a foot or two high. Price: Strong plants, 10 cents each; 75 cents per 10.

**Dahlias.** By all means plant some Dahlias. An old fashioned flower producing a very desirable effect when planted with roses, bulbs or shrubs. We have a good assortment of colors. Price: 20 cents each; \$1.50 per 10.

**Ostrich Plume.** The New Ornamental Grass (Eulalia). Is nearly as beautiful as ostrich plume feathers, when in blossom. Plumes will keep for months or years, drying like feathers. Valuable as a decoration for mantelpiece, sideboard or piano. Price: Strong plants, 10 cents each; 90 cents per 10; \$7.50 per 100.

**Anchusa.** (The Heavenly-Blue Flower.) This is one of the very choicest hardy border plants. It is very hardy, growing from 4 to 6 feet with good culture. It is fully covered with pure blue flowers an inch in diameter, which are of a surpassing beauty and loveliness. It flowers in May, lasting about two months in bloom. Price: Strong plants, 35 cents each, by mail or express.

**Gladiolus.** This is one of the best bulbs for summer flowering. Its cultivation is very simple as it will thrive in ordinary garden soil. They make a splendid effect when planted among roses, peonies and shrubbery. Price of large bulbs that will bloom this season, fine mixed colors, 30 cents per 10; \$2.00 per 100.

PARCEL POST—Hardy Flowering Plants and Bulbs can be sent by parcel post. For list of varieties and prices see page 56.

**Perennial Phlox.** They succeed in almost any position and flower from early July to late autumn. In order to continue their flowering until late autumn it is necessary to pinch the shoots about the first of June and again in July. For early flowers some plants can be left unpinched.

**C. A. Green's Collection of Mixed Colors.** C. A. Green, president of Green's Nursery Company, has for many years been collecting the most beautiful varieties of phlox. This collection consists of practically all known colors, shades and combinations of colors. These are planted in Mr. Green's garden, and from a distance this mass of bloom resembles massed flowers of the rhododendron. The different colored varieties are all mixed together, and as it is impossible to tell the color of a variety from the plant, please do not specify color when ordering from this collection. If you want special colors we refer you to Green's red, white and pink varieties described on this page. Price of strong plants of C. A. Green's collection of mixed colors, 15 cents each; \$1.25 per 10; \$12.00 per 100.

**Green's White Phlox.** These beautiful white phlox are unsurpassed in beauty. The plumes or masses of white blossoms are from 6 to 12 inches long on each branch, and there are from 5 to 10 branches on each plant. Price: 30 cents each; \$2.50 per 10; \$20.00 per 100.

**Green's Pink Phlox.** These are of a beautiful shade of brilliant pink. No garden is complete without them. Price: 20 cents each; \$1.75 per 10; \$15.00 per 100.

**Green's Red Phlox.** A very beautiful shade of dark red, making a fine combination with the white. Price: 20 cents each; \$1.75 per 10; \$15.00 per 100.

A Bunch of Gladiolus Blossoms. Price 20 cents per 10

# FLOWERING VINES

**Clematis Paniculata.** This beautiful Clematis fills a long felt want for a rapid growing, hardy, easy-to-transplant flowering vine. Its beauty is indescribable. It commences to grow very early in the spring and blooms profusely in the late fall. If you can plant only one vine, plant the Clematis Paniculata. A remarkably beautiful climbing plant. Flowers pure white, star-shaped, about one inch in diameter, borne in large clusters; will last several days as cut flowers, retaining their freshness and fragrance. Plant is a strong, quick grower, has broad, healthy foliage, seldom attacked by insects. Chas. A. Green's choice for an easily transplanted, sure blooming plant. Plants set in April or May bloom the next fall. Price: Strong vines, 35 cents each.

**Henryi Clematis.** A vigorous grower and free bloomer, producing its large, pure white flowers constantly during the summer and early autumn. Price: Strong vines, 50 cents each.

**Jackmanni Clematis.** Flowers, when fully expanded, are from 4 to 6 inches in diameter; intense violet purple, with a rich velvety appearance. An abundant bloomer. Price: Strong vines, 50 cents each.

**Virginia Creeper.** (American Ivy.) The good, hardy, native American Ivy. Fine for trellises where a rapid growing vine is needed. Price: Strong vines, 35 cents each.

**Trumpet Vine.** A grand old favorite, hardy climbing plant, with large, trumpet shaped, scarlet blossoms in August. Fine for covering old tree stumps and verandas, or for growing as single specimens. It is very hardy and will thrive everywhere. Price: Strong vines, 35 cents each.

**Hall's Japan Honeysuckle.** An almost ever-green honeysuckle of the greatest value, being hardy and of strong growth. The flowers are fragrant, of a pure white changing to yellow, resembling a Cape Jasmine in odor, and produced in profusion from May to December. Price: Strong vines, 35 cents each.

**Ampelopsis Veitchii.** (Boston Ivy.) This is one of the most beautiful ivies and the latest acquisition. It is a rapid grower and clings tenaciously to brick or stone walls, requiring no artificial fastening or training. A single vine may in time cover the entire side of a house or church. It is hardy and thrives almost everywhere. Price: Strong vines, 40 cents each.

Next year, 1918, the prophets say will be a year of high prices for trees and plants.  
A word to the wise is sufficient.

**Chinese White Wistaria.** Similar to Chinese Blue. Flowers a pure white. Price: Strong vines, 45 cents each.

**Chinese Purple Wistaria.** Similar to Chinese Blue. Flowers a beautiful purple. Price: Strong vines, 45 cents each.

PARCEL POST—Ornamental vines can be sent by parcel post, postage prepaid, for 5 cents per vine extra. See page 56.

Clematis Paniculata in Blossom. Price 35 cents each

**Chinese Blue Wistaria.** One of the most elegant and rapid growing of all climbing plants; attains an immense size, growing at the rate of 15 to 20 feet in a season. Has long pendulous clusters of pale blue flowers in May, June and in autumn. Price: Strong vines, 40 cents each.

Chinese Wistaria

## TREES AND PLANTS BY PARCEL POST

(Postage Paid by Us)

Trees, Plants, etc., packed ready to send by Parcel Post  
**STANDARD APPLES.** We have the following

heavily rooted, strong, 2 to 3 ft. standard apple trees, which we can offer at 20 cents each, postage prepaid by Green: Baldwin, McIntosh, Green's Baldwin, Yellow Transparent, Wealthy, R. I. Greening, Delicious Red, Duchess, American Blush, Jonathan, Wagner, Rome Beauty, King, Northern Spy, Red Astrachan.

**Dwarf Apple Trees** of the following varieties, Duchess of Oldenburg, Green's Improved Baldwin, McIntosh, Red Astrachan, Wealthy, Yellow Transparent. Strong nice trees, postpaid, at 50 cents each.

**Cherry Trees** of the following varieties, Montmorency, Early Richmond, English Morello, postpaid, at 25 cents each. Yellow Spanish, Governor Wood, Napolcon, Windsor, Green's Black Tartarian, postpaid, at 30 cents each.

**Peach Trees.** We have them in assortment, splendid trees, well grown, clean bodied, well rooted. It is well known that Niagara, Elberta, Crawford Early and Crawford Late are the leaders for home and market, and these we desire to call especial attention to. In addition to the good old well known varieties, we offer the new Hale and Rochester.

Here is a list of varieties offered by parcel post: Carman, Crawford Early, Crawford Late, Elberta, Hale, Niagara, Rochester.

**Price:** All varieties named in this list, except Hale and Rochester, 15 cents each, 12.25 per 10. Hale and Rochester, 40 cents each, \$3.50 per 10.

**Standard Pear Trees.** Splendid trees, two years old. Varieties: Anjou, Bartlett, Clapp's Favorite, Flemish Beauty, Gans, Seckel, Wilder Early, Worden Seckel and Lawrence. **Price:** 25 cents each. Beurre Bosc, 40 cents each.

**Dwarf Pear Trees.** Nice trees, well grown and branched. Varieties: Anjou, Bartlett, Clapp's Favorite, Duchess, Flemish Beauty, Gans, Kieffer, Lawrence, Seckel, Wilder Early and Worden Seckel. **Price:** 20 cents each.

**Gooseberries.** Downing is the good, leading American variety. **Price:** two-year bushes, Downing, 10 cents each; 70 cents per 10. Chautauque, 27 cents each; \$2.45 per 10.

**Grapes.** A few vines take up very little space and should be found in every garden, say six of each colored fruit, or more. Varieties offered and prices per two-year vine: **Price:** Concord, Niagara, Worden, 17 cents each; \$1.20 per 10. Delaware, 22 cents each; \$1.45

per 10. Campbell's Early, Lucile, Regal, Diamond, Brighton, 27 cents each; \$2.20 per 10.

**Raspberries.** Cumberland, Plum Farmer and Columbian. **Price:** 10 cents each, 55 cents per 10, \$1.00 per 25, \$2.50 per 100. Cuthbert, 10 cents each, 55 cents per 10, 90 cents per 25, \$2.00 per 100. Herbert, 15 cents each, 80 cents per 10, \$1.40 per 25, \$3.50 per 100. Scarff, 15 cents each, 80 cents per 10.

**Blackberries.** (Thimble berries.) **Price:** Blowers, 10 cents each, 55 cents per 10, \$1.15 per 25, \$3.50 per 100.

**Currants.** Red and white. Every one plants few or many for home or market.

**Price for strong 2-year No. 2 plants:** Diploma, 7 cents each, 60 cents per 10. Red Cross, 7 cents each, 60 cents per 10. Perfection, 16 cents each, \$1.20 per 10. Fay's Prolific, White Grape and Wilder, 10 cents each, 75 cents per 10.

**Plum Trees** of the following varieties: Burbank, Abundance, Reine Claude, Bradshaw, Lombard, German Prune. Strong nice trees, postpaid, for 30 cents each.

**Asparagus.** Giant, Palmetto and Conover's, 2-year, strong. **Price:** 30 cents per 10; \$1.25 per 100.

A special lot of nice one-year plants (sure to please everybody who orders). **Price:** 50 plants for 40 cents; 100 plants for 75 cents, postpaid to any postoffice in the U. S.

**Rhubarb.** 13 cents each; \$1.05 per 10.

## TREES AND PLANTS BY PARCEL POST (Continued)

**Horse Radish.** Strong roots, 30 cents per 10.

**Sage Plants.** Heavy transplanted, 25 cents each; \$2.30 per 10.

**Nut Trees.** Nut trees generally give better results if transplanted when very young. These we offer as 1-year-old and guaranteed to please.

**Thomson English Walnut**  
Trees, grown especially for our parcel post orders from nuts of the famous Thomson orchard, which has produced wonderful crops for many years. This orchard is near Rochester, N. Y., and our patrons can be assured of receiving good hardy little trees.

**Price of Thomson English walnut trees:** 50 cents each; \$4.50 per 10.

**Black Walnut Trees.** Price 10 cents each; 90 cents per 10.

**Butternut Trees.** Price 12 cents each; \$1.10 per 10.

### Strawberry Plants.

Millions of strawberry plants are sent by parcel post to planters all over the country. We do not offer a long list, in fact this season we offer by parcel post only four varieties, but these are varieties that are recognized from Maine to California as good ones, whether for the home patch or for market. **Price:** Corsican, Senator Dunlap and Brandyvine, 25 cents per 10, 45 cents per 25, \$1.50 per 100. Superb Everbearing, 75 cents per 10, \$1.15 per 25, \$3.25 per 100.

**Hedging.** California Privet, planted everywhere, north, south, east and west, by the hundred and by the thousand.

**Price,** strong, 2-year, bushy plants, 15 to 18 inches, 60 cents per 10, \$3.75 per 100.

**Shade Trees.** White Flowering Horse Chestnut Trees. Nice 1-year trees, 15 cents each.

**Ornamental and Flowering Vines.** Clematis Jackmanni and Clematis Henryi, **Price** 55 cents each; Wistaria white and purple, 50 cents each; Wistaria, blue, and Ampelopsis Veitchii, 45 cents each; Clematis Paniculata, Virginia Creeper, Hall's Japan Honeysuckle and Trumpet Vine, 40 cents each.

Thousands of letters bear testimony to the fact that the stock sent was received in excellent condition, and in the Pacific coast states and in every distant state where trees can be grown will be found orchards and gardens planted with trees from our nurseries that were received by mail.

**Bulbs and Perennials.** Gladioli (a splendid mixture of rich colors.) **Price:** 30 cents per 10; \$2.00 per 100.

**Perennial Phlox,** 15 cents each and \$1.25 per 10 for general mixture of colors; 25 cents each and \$2.00 per 10 for selected colors in red, white and pink. **Anchusa** (Blue Flower), 35 cents each. **Golden Glow,** 10 cents each; 75 cents per 10. **Ostrich Plume,** 10 cents each; 90 cents per 10. **Dahlias,** 20 cents each in colors. **Paeonies,** double flowering in colors red, pink, white and two-color, 30 cents each; \$2.50 per 10.

Green's Nursery Co.:

Redland, California.

The trees and bushes you sent us by parcel post arrived in perfect condition. They are nice little trees and have proven very satisfactory.

Yours truly, C. L. GRIGSBY.

Fully 100,000 farmers, fruit growers and flower lovers in the United States, and many abroad, have accepted our proposition during the past twenty years to send them fruit and ornamental trees and plants through the mails and by the parcel post system, and have sent us their orders, large or small, as their needs were.

A satisfactory feature of the trees and plants by mail is that the order can be filled with safety at any time during winter or spring. Must you plant in January or February, send your order and specify this when sending it, and the order will be filled accordingly (except perhaps strawberries, which go later).

Don't forget these prices are for plants sent by parcel post, **postage paid by us and delivery in good order guaranteed.** For prices by express and freight at purchaser's expense, and full description of varieties, see main pages of this catalog.

### THE BEST VARIETIES TO PLANT.

There are hundreds of varieties of apples, peaches, pears, plums, cherries, currants, paeonies, phlox, roses, in fact of all kinds of fruit and ornamentals. Some nurserymen offer all these numerous varieties without knowing whether they are good varieties or not. We have a large experimental or test orchard and farm where these numerous varieties are tried out and tested. The varieties that are offered in this catalog are the ones that we have found to be the best. They are the cream of nearly fifty years of careful selection. Confine your selection to this catalog and you will be getting only the choice varieties.

A wise man has said that if he knew he would die tomorrow he would plant a tree today, having in mind the continuous good work that a fruit tree should accomplish.

Do your bit. This is the national slogan. One way to do your bit is to plant shrubs and trees. Another way is to get your neighbor to join you in sending in an order for trees.

**Liberty Bonds.** Green's Nursery Company for the present will accept Liberty Bonds in payment for plants, trees and vines at prices named in this catalog.

1918 prices on the following pages cancel all previous prices and are subject to advance. Order early.

## The O. K. Cog Gear Barrel Spray Pump

It is built to withstand the destructive acids, lime and other spray materials which cause the ordinary sprayers to fail in the fight. It has a patent brass cylinder plunger and ball valves, making it almost indestructible. The handle is wrought steel with cog gear, to enable the operator to maintain a pressure of 200 lbs. or more, if necessary, with very little effort. The O. K. Spray Pump is one of the most formidable weapons in the warfare against all insects and pests of every kind.

Price, Pump only, without barrel or hose . . . . . \$18 00  
 Price, as illustrated, without barrel, including two  
 15-ft. lengths of hose, nozzles, complete . . . . . \$27.50

## The Handy Portable Sprayer

Is made for general use as a handy outfit about the garden, poultry house, and small orchard. Tank made of heavy galvanized iron reinforced at top and bottom by steel bands, capacity 12½ gals. Wheel and handles are made of wrought steel.

Pump is practically same as No. 18, described above, and is attached to tank by a clamp and held in place by thumb screw.

Price, complete including mechanical agitator, 15 ft. hose and nozzle, 2—4 ft. extension pipes \$25.00

## The Bidwell Junior Sprayer

The latest product, something better in a low-priced sprayer.

Made of extra heavy galvanized steel, shaped both top and bottom to resist pressure, tank measures 9 in. by 16 in., holds about three gallons liquid; two feet of hose, extension shoulder strap, "D" handle stopcock, and a regular power Spray Nozzle, the Winkle Mist, of course. Twice pumping sufficient to discharge the entire contents. Fine for whitewashing or any spraying materials.

Price, complete . . . . . \$6.00

## Green's Cog Gear Barrel Spray Pump No. 18, for Small Orchard

Best Pump on Earth for the Money

It has bronze ball valves and brass seats; the plunger is brass, fitted with hemp packing. Will handle hot, cold or any caustic mixture. The cylinder and discharge pipe are all brass. The air chamber is 32 inches in length, enabling the pump to throw a uniform, constant and elastic spray. It has good leverage, is very powerful and easily operated. The Mechanical Agitator stirs the solution from the bottom, making it impossible for this pump to clog under any circumstances.

The new base is made so that the pump can be used on any barrel, regardless of height.

Price, as illustrated, including mechanical agitator, 15-ft. hose and nozzle, ready for use . . . . . \$14.00

## Bucket or Barrel Spray Pump

**Two Pumps in One**—It has all the advantages of the ordinary barrel pump and bucket pump combined. Has one-half more air chamber than any other make of bucket pump. Is made of brass with ball valves; handle and foot rest are malleable iron. When used as a barrel pump, detach the footrest and attach pump to top of barrel. Remove cap to nozzle and use for washing buggies, windows, etc. No. 24, complete, with Agitator, 5-ft. of hose and nozzle, ready to use . . . . . \$6.25

Price, with 4-ft. Extension pipe for higher trees . . . . . \$6.75

Price, 8-ft. Iron Extension pipe . . . . . .75

Price, 4-ft. Iron Extension pipe . . . . . .50

Can be used with any sprayer listed.

## The Best Hand Sprayer

The newest and best Hand Sprayer on the market for house and garden use. The patent mixer, a valuable improvement over all other hand sprayers, stirs the solution thoroughly.

Price, with patent mixer, boxed for shipment (weight, box and all, 6 lbs.) . . . . . \$1.25

## The Favorite Cog Gear Spraying Outfit

**Special Features:** Cog gear movement, increased leverage adapted for spraying under heavy pressure, mounted complete, occupying smallest possible space. The working parts of the pump that come in contact with the solution are all made of brass, thus making it almost indestructible. Capacity sufficient for 8 nozzles, well adapted for spraying potatoes, trees, etc.

**Price**, as illustrated, including pump complete, 50-gallon barrel mounted on skids, pressure gauge, 15-ft. hose, nozzle, 8-ft.

extension pipe with lever shut-off and mechanical agitator.....\$40.00

**Price**, as illustrated, same as above, with two 15-ft. lengths of hose, two nozzles, two 8-ft. extension pipes with lever shut-off and mechanical agitator.....\$45.00

## Knapsack Sprayer for Fruits and Potatoes

A convenient outfit with which to spray from four to six acres of small fruit or potatoes in a day. The tank holds 5 gallons, and is fitted with lid and strainer. The pump has a large air chamber, ball valves, solid plunger and agitator, and is also fitted with handle, so the operator can use it the same as our tank with bucket pump.

**Price**, No. 330 Knapsack Spray Pump, with 5 feet of one-half inch hose, pipe extension and nozzle.....\$10.00

**Price**, No. 331, with solid copper tank with same attachments as above.....\$16.00

## Whitewashing and Painting Machine

For Whitewashing, Cold Water Painting, and General Purpose Spraying, with Patent Double Agitator. A most complete and serviceable outfit. The tank is made of heavy galvanized iron with a wide bottom so as to set steady in operation. Tank holds 7 gallons. The pump is of brass, with large air chamber; throws continuous spray, and is fitted with Bordeaux nozzle, brass ball valves, and has both jet and dasher Agitator.

**Price**, complete as illustrated.....\$11.00

## Instructions for General Purpose Spraying

**1st Spraying.**—Use Lime-Sulphur or Scalecide in the fall after the leaves have fallen, or in early spring while the trees are in a dormant condition.

**2nd Spraying.**—Use Lime-Sulphur and Arsenate of Lead, or Bordeaux Lead Arsenate mixture, just before the buds begin to open.

**3rd Spraying.**—Use Lime-Sulphur and Arsenate of Lead, or Bordeaux Lead Arsenate mixture, just after the blossoms fall.

**4th Spraying.**—Use Lime-Sulphur and Arsenate of Lead, or Bordeaux Lead Arsenate mixture, ten days after the third spraying.

**5th Spraying.**—Use same solution as in fourth spraying from the tenth to the last of July.

For leaf-eating insects use Arsenate of Lead on appearance of insect.

For sap-sucking insects use Sulpho-Tobacco soap on appearance of insect, except on San Jose scale and other scale insects use Scalecide or Lime-Sulphur when the trees are dormant.

For fungus and blight use Lime-Sulphur or Bordeaux mixture on appearance.

## RELIABLE SPRAY SOLUTIONS READY TO USE

**BORDEAUX MIXTURE**—Price of one gallon in condensed form making 50 gallons of spray by adding 49 gallons of water, \$2.00; 5 gallons, \$7.50.

**ARSENATE OF LEAD**—Use one to three pounds of Arsenate of Lead to 50 gallons of water or Bordeaux Mixture diluted. **Price**, 1 lb., 50c.; 5 lbs., \$2.00; 10 lbs., \$3.75; 25 lbs., \$7.00; 50 lbs., \$12.00; 100 lbs., \$21.00.

**BORDEAUX LEAD ARSENATE MIXTURE**—This is a fungicide and insecticide combined. Use one gallon of Bordeaux Lead Arsenate to 49 gallons of water. **Price** per gallon can, \$2.50; 5 gallons, \$10.00.

**LIME-SULPHUR**—Much used for San Jose scale and other scale insects. **Price**, one gallon, making from eleven to forty-five gallons of spray, dilute as per directions on package, \$1.35; 5 gallons, \$4.50. **Price** per barrel (30 gallons), \$8.50; per barrel (50 gallons), \$12.00.

**SULPHO-TOBACCO SOAP**—A spray much used for aphid and other sap-sucking insects, on trees, roses, house plants, and small fruits. **Price**, 8 oz. cake, making 5 gallons of solution, 35 cents, postpaid; 10 lb. cake, \$3.50, not prepaid.

**SCALECIDE**—A guaranteed remedy for San Jose scale, Apple Leaf roller, Psylla; is a petroleum oil that mixes at once with cold water and stays mixed. Add one gallon Scalecide to each fifteen or twenty gallons of water. **Price**, 1 gallon, \$1.25; 5 gallons, \$5.25; 10 gallons, \$9.00; 30 gallons, \$19.25; 50 gallons, \$29.50.

**BOROWAX**—A preventive for all borers, when properly applied, to Peach, Plum, Apple, Pear and Quince trees. This is not a cure but a preventive. May and June are the best months to apply. **Price**, 1 quart, 50 cents; half gallon, 75 cents; 1 gallon, \$1.25; 6 gallons, \$6.00; one-half barrel (26 gallons), \$24.00; one barrel (52 gallons), \$40.00.

The Service Department was established by C. A. Green for the convenience of patrons who are unable to buy in their local stores, sprayers, spray materials, pruning tools, strawberry baskets and other things needed in planting, pruning, painting, cultivating, spraying, picking and marketing fruit. We have made careful selection of some of the most practical implements along these lines which are known to be desirable and effective in doing the work for which they are intended. The prices are in many instances lower than the regular prices out of the stores where they are sometimes sold. We regret to recommend this Department for your convenience and would suggest that you order early to avoid possible delays in transportation. Our terms are cash with order, as the prices are based on that method of selling, which is decidedly best for all concerned. Prices are also f. o. b. Rochester, or when shipped direct from the factory, f. o. b. factory.

## The Home Evaporator

For drying all kinds of fruits, vegetables, etc., can be used on any stove. No extra fire needed. It has been thoroughly tested and proved to be the best for the price. Don't let your fruit go to waste. Order one of these driers at once.

Price, .....\$7 00  
 Price, with apple parer No. 1, ..... 7 75  
 Send for circulars describing larger Evaporators, Parers, etc.

## Green's Apple Parer

**No. 1, for Home Use**—Pares, cores and slices the fruit. There is nothing about it to break or get out of order, while the wear is so slight as to make it almost everlasting. Can be used to pare without coring or slicing.

Price, No. 1, postpaid, .....\$1 25

## Sensible Fruit and Jelly Press

A well made and handsome press for making wines, jellies, syrups, etc.

Made with special reference to strength, and guaranteed against breakage under any fair usage. All iron and steel, stronger and better than the old wooden press. It has double curbs.

Price, 2 quart size, weight 15 lbs. .... \$3 00  
 Price, 4 quart size, weight 30 lbs. .... 4 50  
 Price, 10 quart size, weight 40 lbs. .... 7 00

## Enterprise Fruit, Wine and Jelly Press

Three in one. Cleanest and best. The only one that separates juice, seeds and skins at one operation. For making wines, jellies and fruit butters, from grapes, raspberries, currants, quinces, etc. The dryness of the pulp may be regulated by thumb screw at the outlet. Aunt Lou's Jelly book free with each press.

Special Price, complete, (weight 15 lbs.) .....\$5 50

## Green's Fruit Picking Bag

Made of heavy weight duck and so arranged as to equalize the load on both shoulders. Opening is arranged so that both hands can be used in picking. A draw string is used so that the fruit can be let out of the bottom of the bag when the bag is to be emptied. Capacity three pecks. Price, each, .....\$1 75

## "INSECTS AND INSECTICIDES"

gives illustrations, descriptions and remedies of all kinds of pests, besides valuable information about Pruning and the Care of Orchards. A practical book with 334 pages, 5 x 7. Price, postpaid, \$1.50.

Send for circular of books pertaining to Fruit Growing.

## The No. 1 Bone, Shell and Corn Mill

For poultrymen. Will grind dry bones, shells, all kinds of grain, gravel, stale bread, crackers, roots and barks for poultry yard. One customer writes that he ground and sold \$105.00 worth of oyster shells on the No. 1 mill and it is as good as new.

Price, (weight 33 lbs.) .....\$5 00

## Export Family Grist Mill

Grind your own graham flour, corn meal, coffee and spices for table use and cracked corn for poultry. Hand wheel 19 1/2 inches in diameter. A pound of wheat can be ground in about one minute; also grinding any other kind of grain, separate or mixed, roots, barks, etc., fine or coarse as desired.

Price, (weight 23 lbs.) .....\$4 00

## The "Crown" Green Bone Cutter

Is one of the most practical green cutters on the market today. It has steel knives that can be taken out and sharpened. Turns easily, as the diameter of the hand wheel is 21 1/4 inches.

Price, (weight 50 lbs.) .....\$9 00

## Champion Leg Bands for Poultry

Made of aluminum, the lightest and best material, impossible to lose off and will stay where you put them. Price, postpaid 25c per 25; 40c per 50; 75c per 100.

## The Niagara Fruit Ladder

A ladder made from the best selected white basswood, with tie rods at every other step. A model for strength, lightness and durability. It always stands and never rocks, no matter how uneven the ground may be.

Price, (8 ft) .....\$3 50

## Wood Veneer Tree Protectors

Insure your orchard against the ravages of rabbits, mice and sun scald, by using these protectors. Size about 9 1/2 x 18 inches. Soak the protectors in water before using to prevent their cracking.

Price, \$1 50 per 100; \$6 50 per 500; \$12 00 per 1000.

Sample by mail postpaid 10c.

**"Fruit Growers' Favorite" Pruning Saw**

has a self-feeding draw cut blade with a thin back that will not

pinch or bind. It will cut limbs closer to the tree and will do three times the amount of work than any other saw.

Price.....\$2.00

**Dagger Point Pruning Saw**

Is a general purpose saw, which can be used for pruning and farm work. The blade is 20 in. in length and is made of the best steel.

Price.....\$1.75 each

**Rockdale Pruning and Snagging Shears**

One of the most practical pruners on the market today. Well made and guaranteed against flaws in fair usage.

Price, No. 35, length 26 inches, not postpaid....\$1.25

**The Levin Tree and Grape Pruner**

One of the strongest and easiest cutting pruning shears made.

Price, postpaid...\$1.00

**Green's Grafting Tool**

A complete tool for grafting, made in one piece of forged steel.

Price, postpaid.....\$1.00

**Green's Grafting Wax**

Price, half-pound package, postpaid.....\$.40

Price, pound package, postpaid......55

**Standard Tree Pruner**

With Metal Brace Plate, Anti-Rust Rod, Steel Lever. Standing on the ground the operator can cut from distance of arm's length to a height of 18 feet, according to the length of pole, the smallest twig or a branch an inch in diameter.

Price—Length	4 ft.	weight	3½ lbs.	\$1 00	
"	"	6 "	"	4 "	1 10
"	"	8 "	"	4½ "	1 50
"	"	10 "	"	5 "	1 60
"	"	12 "	"	6 "	1 75

**Norcross Hand Cultivator**

Price, complete with 4 ft. handle.....\$1.00

**Standard Berry Basket**

A good clean basket means a high price for the fruit. We have a good clean basket for sale at reasonable prices.

Price of quart and pint baskets, \$3.50 per 500. \$6.50 per 1000. \$6.25 per 1000 in lots of 3000.

Price of lapped-corner huckleberry quarts, \$4.00 per 500. \$7.00 per 1000. Order early before prices advance.

**The Master Plant Setter**

A Man with a Master's Plant Setter will set, water and fertilize 10,000 plants per day. No blanks—no stooping — no more lame backs.

Don't wait for showers, but keep the planter going every day, and by using water or liquid fertilizer will produce the best stand of plants seen for many a day. For cabbage, tomatoes, tobacco, celery, etc. Weight packed, 7 lbs.

Price.....\$5.00

If wanted by Parcel Post add postage for 7 pounds.

**No. 17 Planet Jr.**

**Single Wheel Hoe**

Price \$7.50

Steel Frame  
Steel Wheel

We offer this Single Wheel Hoe as the highest type of its class, and there is scarcely any garden culture of which it is not capable. All steel parts of the Planet Jr. tools are oil tempered and work to a charm.

**No. 4 Planet Jr.**

**Combined Hill and Drill Seeder, Wheel Hoe, Cultivator, and Plow**

Price complete...\$17.00

As a Seeder only...\$13.50  
Holds 2½ Quarts of Seed

Plants all garden seeds accurately in hills; or drills, and sows and presses quickly and thoroughly. Saves time, labor, and money. For more details, see 72 page Planet Jr. catalog sent free on request.

ORDER EARLY. Freight traffic may be irregular, therefore we suggest express shipments. To insure no delay either way. We therefore urge you to ORDER EARLY.

# Bargains Extraordinary

## Special Low Priced Offers for Spring 1918

This Bargain List is sent to a few of our patrons and friends. We anticipate that the stock will be sold quickly and advise early ordering.

If a nurseryman grows his own stock—the stock that he sells—he always has more or less small sized fruit trees when clearing off the blocks, trees that are not quite tall enough or large enough to be offered in the regular grades offered. If he grows shade and ornamental trees largely there is bound to come a time when he will find that he has an over supply of bigger stock of some sizes—trees that should be moved.

We are growers of large blocks of trees. We dig hundreds of thousands of trees every season, thus we have a prime lot of these smaller sized fruit trees, and finely grown shade and ornamental trees, to offer at a special low price. All of these fruit trees are two year olds, well shaped trees, heavily rooted, and desirable for garden or orchard planting.

### Below is the List of Bargains:

#### 10,000 Apple Trees.

Comprising all the leading varieties as offered in body of catalog. Prominent among these apple trees are American Blush, Baldwin, Duchess, Green's Baldwin, Jonathan, McIntosh, Northern Spy, R. I. Greening, Rome Beauty and Wealthy.

Price of these selected two year trees, 4 to 5 ft. or more in height, as described above, \$1.50 per 10, \$10.00 per 100.

#### 10,000 Pear Trees (Standard).

Comprising all the leading varieties, an especially nice lot of Bartlett, all strictly two year trees, 3 to 4 ft. or more in height.

Price \$1.25 per 10, \$4.50 per 50, \$9.00 per 100.

#### 10,000 Pear Trees (Dwarf),

Anjou, Clapp's Favorite, Bartlett, Seckel, Worden Seckel, Kieffer, etc., splendid two year trees, well headed. Plant 50 or 100 in a row across your garden, 3 feet apart, as C. A. Green has done and advises.

Price \$1.25 per 10, \$4.50 per 50, \$9.00 per 100.

#### 5,000 Cherry Trees,

Not a large assortment, mainly the reliable and profitable Montmorency. Early buyers may secure a fair assortment of other varieties offered in body of catalog.

Price of prime two year trees, 3 to 4 ft. or more in height, each 25 cents, \$2.00 per 10.

#### 5,000 Plum Trees.

Two year, well grown on plum roots: Abundance, Burbank, Bradshaw, York State, German Prune, Lombard, etc. Price, 3 to 4 ft. or more in height, each 25 cents, \$2.00 per 10.

## Green's American Fruit Grower

THE OLDEST HORTICULTURAL MAGAZINE IN AMERICA. IT WAS STARTED BY MR. GREEN TO HELP THOSE WHO WERE PLANTING FRUIT TREES, SHRUBS AND VINES TO IMPROVE THEIR HOMES. IT TELLS MONTH BY MONTH JUST HOW TO TAKE CARE OF GROWING THINGS ABOUT THE HOME THROUGHOUT THE YEAR. PLANTING, PRUNING, SPRAYING PICKING AND MARKETING ARE AMONG THE LEADING SUBJECTS. WE RECOMMEND TO THOSE WHO ARE PLANTING THAT THEY HAVE GREEN'S AMERICAN FRUIT GROWER COME TO THEIR HOME THE YEAR AROUND. YOU WILL FIND IT HELPFUL AND WORTH MUCH MORE THAN IT COSTS.

BUDDING TREES AT GREEN'S NURSERY COMPANY FARMS, ROCHESTER, N. Y.

## Secrets of the Nursery

There are few people who understand the secrets of tree growing. There are few who realize the patient work of years required to produce an apple, a pear or other nursery trees. If you knew how difficult it is to make a tree, you would wonder how trees could be sold at the low price mentioned in this catalog.

The starting point is in having fertile soil, well drained and carefully prepared. In this soil, little seedling trees grown in France are planted by the hundred thousand. These little trees are skillfully cultivated until August or September. At this time the budders shown in above photograph start budding, which consists of inserting at the base of each little tree a bud, for instance, of the McIntosh or Banana apple, or in case of pear seedlings of the Bartlett or Anjou pear, or in the case of peaches, of the Elberta or Rochester peach. Great skill is required in inserting the buds, which remain dormant until the following spring, when they begin growth, rising in some cases to a height of four or five feet, thus forming a one-year-old tree. If left undug until the next spring, as is usually the case, then you have the two-year tree of orchard planting size.

There are perhaps a hundred nurserymen in Rochester, N. Y., and many in other localities, who do not grow a plant, tree or vine, and have no money invested in nursery farms. Green's Nursery Co. differ from these nurserymen in having four separate nursery farms where they grow their trees, using scions and buds from bearing trees, giving assurance that the varieties are as represented. Is it not evident that the trees propagated and grown by us on our own land are of more value than those purchased here and there without certainty of their being true to name?
